

Global Online Dating Services Market Expected to Reach \$ 9,202.7 Million by 2025

Online Dating Services Market : Global Opportunity Analysis and Industry Forecast, 2018 - 2025

POTLAND, 5933 NE WIN SIVERS DRIVE, #205, OR 97220, UNITED STATE, September 6, 2021 /EINPresswire.com/ -- According to a new report published by Allied Market Research titled, "[Online Dating Services Market](#) by Services, Subscription and Demography: Global Opportunity Analysis and Industry Forecast, 2018 - 2025," the global online dating services market size was valued at \$6,400 million in 2017, and is projected to reach \$9,202.7 million by 2025, growing at a CAGR of 4.7% from 2018 to 2025. In 2017, North America accounted for nearly 38.6% revenue share of the online dating services market.

Online dating service facilitates and creates platforms for its customers to find their significant other based on various parameters that these service providers take into consideration. The global online dating service market is segmented into services, subscription, demography, and region.

On the basis of services, the online dating services market is categorized into matchmaking, social dating, adult dating, and niche. Matchmaking is a process where the services provider facilitates the perfect match between two individuals, based on various factors such as personality, behavior, and earning status. Social dating is predominantly a service targeting the youth, where one can opt to get into long term or any kind of nonmonogamous relationship. Niche dating consists of senior citizens or single parents as their target customers.

Based on subscription, the market is segregated into annually, quarterly, monthly, and weekly subscription. Among these subscription plans, quarterly subscription is most preferred and economical plan for its target customers. Customers subscribe these online dating sites in the view of getting access to various lucrative offers and services that are being provided by these sites. Owing to higher rate of quarterly subscription among target customers, some major service providers strategize by coming up with lucrative offers and discounts.

In terms of demographic, the market is bifurcated into millennial and baby boomers for online dating services industry.

Majority of the customers, especially in their 20s, are reluctant to get into monogamous relationship in this phase of life, since they consider various factors such their career or any other extracurricular activities more important than getting into a long-term relationship. These kind of customers find consensual, nonmonogamous relationship more satisfying, both physically and psychologically. Thus, online dating services serve as an ideal platform for these customers, facilitating casual dating to instant hookups. This has triggered the number of audiences for various online dating services. Hence, in 2017, the millennial segment accounted for 70% of the share in the global online dating services market.

Provision of services such as matchmaking, social dating, or casual dating drives customers to sign up to social dating sites. However, some of the lucrative or customized services are limited to customers who subscribe by paying certain amount. For unpaid customers, such services are restricted to certain extend.
