- Cultures segment is expected to grow at a CAGR of 5.3% during the forecast period. There are

Reports And Data

two basic categories of cultures, Mesophilic and Thermophilic. Mesophilic cultures require low heat and are non-operational at higher temperatures while thermophilic cultures need high heat and will not work correctly until those temperatures are reached.

- Technological advancements in the dairy industry like chemical-free separation, ice pigging, etc. are proving to be growth drivers for cheese ingredients market. When ice is used for pigging instead of water, it results in less wastage and higher product recovery.
- Waste retrieval by activities like utilizing 100% milk is a focus of key market players. Arla Food ingredients use a milk-protein based powder for this purpose, which ensures no production of by-product or waste. Hilmar Cheese is another company that is making efforts to obtain 100% of milk-derived water and redirect it for use in irrigation and landscaping
- The natural cheese segment is a rapidly growing segment with a CAGR of 5.1 % during the forecast period; owing to rising health awareness among the people in western countries
- Genetically advanced bacteria and microorganisms, as well as genomics and proteomics, are increasingly leading to improved fermentation, and these advances are being widely accepted in the cheese ingredients market
