-- According to IMARC Group's latest report, titled "[Facade Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026](#)", the global facade market is expected to exhibit moderate growth during 2021-2026. A facade is the exterior front of a building, primarily consisting of roofing, street awnings, ventilation

louvers, etc. It is usually made up of wood, ceramic, polyvinyl chloride, metal, concrete, glass, stone, etc. Some standard types of facades include cladding, curtain wall, siding, exterior insulation finishing system (EIFS), etc. Facades provide enhanced waterproofing, durability, fabrication, and weather protection while offering an aesthetic appeal to the building. They are also utilized in energy-efficient buildings to regulate internal temperature, control light penetration, and provide thermal insulation.

Rapid urbanization and the escalating number of modern infrastructures across the globe are primarily driving the global facade market. Furthermore, the increasing focus towards aesthetically appealing building designs and elevating consumer living standards are also augmenting the market growth. Additionally, the rising adoption of facades in corporate buildings and industrial facilities based on their improved durability, fabrication and weatherproofing, is further catalyzing the demand for facade infrastructures. Besides this, various architectural companies are developing modern, eco-friendly facade designs to overcome restrictions concerning soundproofing and excess heat control. Moreover, the

introduction of smart facades integrated with thermo-bimetals is expected to further propel the market in the coming years. Looking forward, the global facade market is expected to grow at a CAGR of 6.4% during the forecast period (2021-2026).
