MILAN, MI, ITALY, September 8, 2021

/EINPresswire.com/ -- Hudi a British company incorporated in London and founded to develop the technological ecosystem at the base of the challenge to allow the so-called data monetization, announces its [IDO](#) on 15th September 2021.

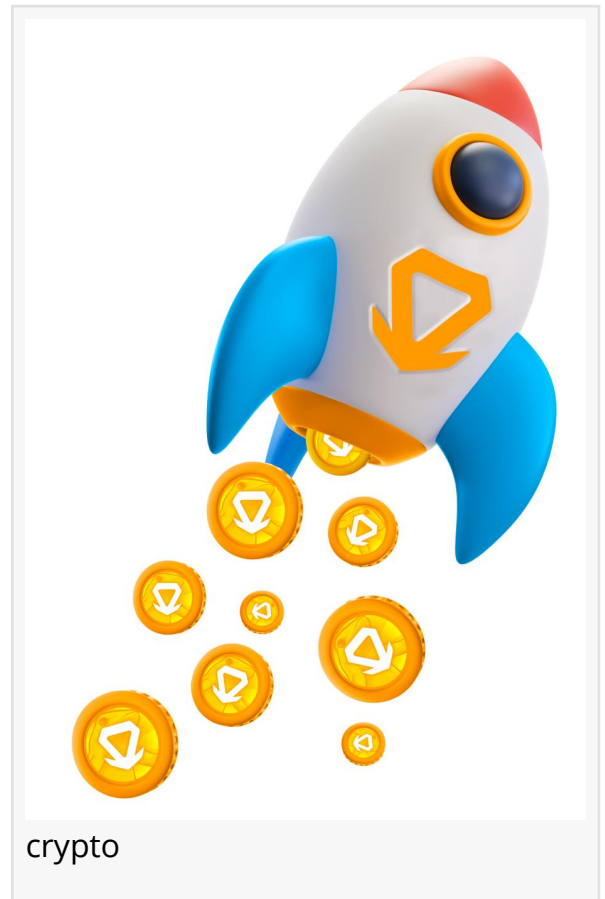

After long and accurate preparation, HUDI has come up with the initial DEX offering and will present the native HUDI Token on PacakeSwap.

The breakthrough DeFi Data Ecosystem, allows data owners to securely collect their data and monetize it, anonymously, for a reward paid in crypto: HUDI tokens. These tokens will then empower data owners with De-Fi tools such as Staking, Liquidity Providing and Lending.

HUDI Token (HUDI) is a BEP-20 utility token based on the Binance Smart Chain blockchain and will be used as a means of exchanging the data, to power the ecosystem through all its elements.

IDO, which stands for Initial DEX Offering, is the new model of participation in a crypto project, evolution of the old ICO. An IDO is when a project launches a token through a decentralized liquidity exchange, which administers the event on behalf of its operatives. This model allows to raise money through built-in liquidity pools without depending on intermediaries.

"We are really excited to finally launch our IDO. You shouldn't miss the chance to play a role in one of the most promising DeFi projects of 2021. Data is the new gold and it's our property: let everybody earn from their data. A detailed HUDI allocation table is available on <https://asset.humandataincome.com/docs/litepaper.pdf>
