

ReleaseOwl announces native Infrastructure Monitor for SAP HANA hosted on AWS and Azure

*SAP Customers can monitor critical applications and business processes built on Azure and AWS 24*7, for availability, performance, and operation with ReleaseOwl*

HYDERABAD, TELANGANA, INDIA, September 9, 2021 /EINPresswire.com/ -- ReleaseOwl, the leading native DevOps platform for SAP applications built on-premise and cloud has extended its capabilities into the Infrastructure monitoring with its unique - ReleaseOwl "Infrastructure Monitor" for SAP Solutions.

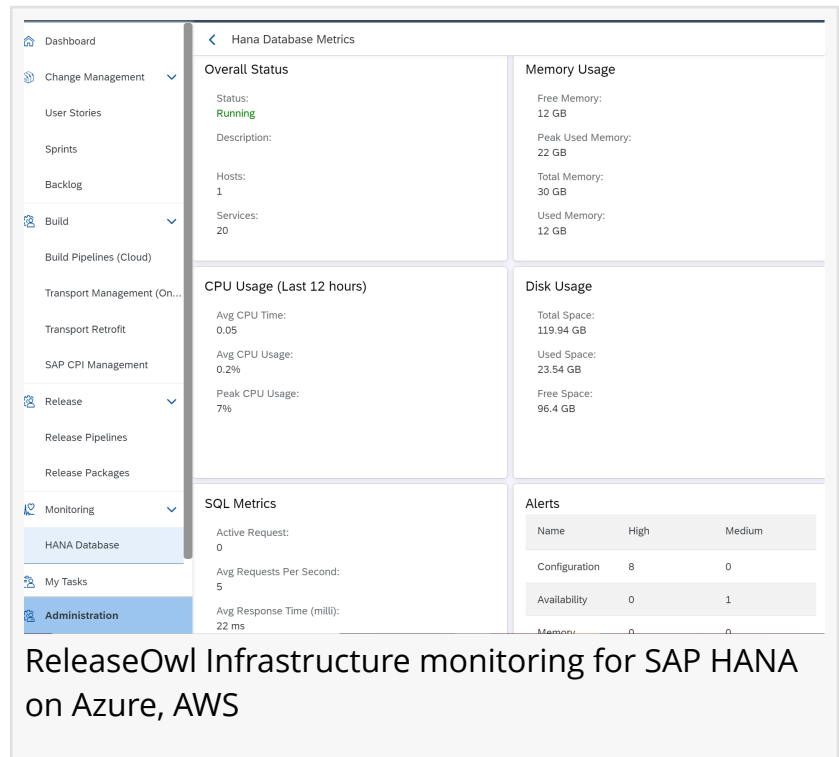

"Infrastructure Monitor" is an SAP native monitoring solution (bundled along with the ReleaseOwl DevOps Platform) which SAP customers can use to monitor their HANA infrastructure of critical applications and business processes hosted on Azure or AWS.

With Infrastructure Monitor for SAP Solutions, you can collect telemetry data from Azure / AWS infrastructure and databases correlate telemetry data for faster troubleshooting.

As of this release, the support is for SAP HANA with the following telemetry :

- CPU, memory, disk, and network use
- HANA backup
- HANA host status
- Top tables
- File system use

The future releases have scoped for the telemetry related to monitoring SAP Netweaver for

Message Server / Enque Server / Work Process stats etc.,

Is there separate licensing required to obtain Infrastructure monitor ?

NO. This is currently bundled along with Enterprise SAAS subscription of ReleaseOwl.

About ReleaseOwl :

ReleaseOwl is the first Native DevOps Platform that has well defined DevOps workflows for SAP Applications built on ECC, S/4 HANA, SAP Business Technology Platform (BTP), CPI and XSA Applications.

Here are the high-level features of ReleaseOwl:
