Detailed value projections on every market segment along with a year-on-year assessment and market attractiveness of every service across every key country worldwide has been covered in the report using an all-inclusive market segmentation. The managed network services market report covers assessment on various key segments such as service types, enterprise types, end use verticals and regions.

The managed network services market report offers historical data and forecast projections on every market segment.

Analysis on the managed network services market includes detailed examination on service type, enterprise type, end use vertical and region.

Analysis on various services includes as managed voice, managed VPN, managed security services, managed conferencing and managed WAN/SD WAN.

Enterprise type segmental snapshot covers insights on small enterprises, medium enterprises and large enterprises.

End user analysis covers a large pool of industries including banking & securities, insurance, communication, media & services, healthcare providers, manufacturing & natural resources, retail, wholesale trade, transportation, transport, utilities, education and government.

Comprehensive research on managed network services market includes regional tracking across North America, Latin America, Europe, CIS & Russia, Japan, Asia Pacific Excluding Japan (APEJ) and Middle East and Africa (MEA).

Recent technological breakthroughs in the telecommunications space have accelerated the demand for new managed network services that can facilitate efficient processing, consequently enhancing accuracy in various applications. Against the backdrop of these benefits, significant investments have been made in the IT and telecommunications, retail, BFSI and public sectors are likely to present lucrative opportunities with respect to adoption of managed network services

Demand of managed network services are expected to grow at a significant pace in the emerging economies of Asia Pacific excluding Japan (APEJ) such as China and India during the period of forecast. Growing manufacturing sector and significant developments in BFSI, banking and retail sectors are expected to augment the growth of managed network services in APEJ. However, developed countries of North America, especially the United States are likely to show burgeoning sales owing to robust and growing IT infrastructure in the country.

Demand of managed network services are likely to spur among SMBs (small and medium business enterprises). Low budget allocation in SMBs has triggered outsourcing of network functions in a bid to save additional costs apropos to installation and maintenance as well as enhance agility and increase flexibility of operations. On the other hand, assessing the vitality of managed network services as potential cost reducers, large scale enterprises, are also pitching in investments in the managed network services space to facilitate reduction in downtime of networks, effective maintenance and proactive monitoring.
