

Global Lung Cancer Drugs Market Trends, Strategies, And Opportunities In The Lung Cancer Drugs Market 2021-2030

The Business Research Company's Lung Cancer Drugs Global Market Report 2021: COVID-19 Impact And Recovery

LONDON, GREATER LONDON, UK,
September 13, 2021 /

EINPresswire.com/ -- According to the new market research report 'Lung Cancer Drugs Global Market Report 2021: COVID-19 Impact And Recovery'

published by The Business Research Company, the [lung cancer drugs market](#) is expected to grow from \$8.06 billion in 2020 to \$8.67 billion in 2021 at a compound annual growth rate (CAGR) of 7.6%. The growth is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$12.84 billion in 2025 at a CAGR of 10.3%. The rising prevalence rate of lung cancer is a major driver for the lung cancer market.

The lung cancer drugs market consists of sales of lung cancer drugs. Lung cancer is a type of cancer that decreases the ability of lungs to supply oxygen to the bloodstream because of uncontrolled growth of tissues in the lung. Some of the possible treatments for lung cancer include surgery, chemotherapy, radiation therapy and targeted therapy. On the basis of the size of the tumor cells, lung cancer is broadly divided into small cell lung cancer (SCLC) and non-small cell lung cancer (NSCLC).

Trends In The Global Lung Cancer Drugs Market

Targeted drug therapy in combination with other therapies is an emerging trend in the lung cancer market. It involves the use of immunotherapy drugs combined with other therapies such as chemotherapy that help in early diagnosis, prevention and treatment of the disease. In this regard, drug manufacturers are developing targeted drug therapies for better diagnosis and
