

Why Software Developers Are Leaving Their Jobs [Survey Results]

Devetry surveyed approximately 490 software developers in July 2021.

DENVER, CO, UNITED STATES,
September 13, 2021 /

EINPresswire.com/ -- Because technical talent is scarce, Devetry, a software consultancy, recently conducted and published a software developer survey. One question was, “why did you leave your last job?”

The responses are as follows:

- 21.6%: Lack of professional growth opportunities
- 20% Poor relationship with management
- 18.4% Compensation
- 10.8% Burnout
- 7% Lack of flexible work options
- 6% Layoff (COVID or otherwise)
- 2.7% Lack of remote options
- 13.5% other

Devetry found that for women, almost 40% reported a “lack of professional growth opportunities” as their number one reason for leaving. For men, the number one response was “poor relationship with management” at 21%.

This survey was conducted in July 2021. Approximately 490 [software developers](#) took the survey. Results are published in a gated report, but marketing is happy to send it out to anyone interested.

Devetry (part of Dept) is a software consultancy that provides technology solutions ranging from strategy and product management to custom software development and UX/UI. Devetry’s diverse expertise allows its partners to rapidly develop software products, optimize internal processes, and create new revenue streams.
