

South East Asia and Australia Green Building Materials Market to hit \$38.5 billion and growing at 9.7 CAGR by 2030

The report offers detailed segmentation of the South East Asia and Australia green building material market based on product type and country.

PORTLAND, UNITED STATES, USA, September 14, 2021 /EINPresswire.com/ -- [South East Asia and Australia green building material market](#) generated \$15.3 billion in 2020, and is expected to garner \$38.5 billion by 2030, witnessing a CAGR of 9.7% from 2021 to 2030, According to the report published by Allied Market Research. The report offers a detailed analysis of changing market trends, top segments, key investment pockets, value chain, regional landscape, and competitive scenario.

Decrease in emission from green building materials and low operation cost drive the growth of the South East Asia and Australia green building material market. However, cost concern and market barriers restrains the market growth. On the other hand, growth in construction sector creates new opportunities in the coming years.

Covid-19 Scenario:

1. The outbreak of covid-19 majorly impacted the construction sector, owing to which, the green building material market witnessed declined demand growth in South East Asian and Australian regions. Increase in the risk of infection among the workforce resulted in delayed construction projects, especially during the initial stage.
2. Several green building materials manufacturers in these regions either suspended or declined their operations which impacted the supply chain. Also, the decreased purchasing potential of suppliers affected the market throughout the pandemic.
3. On the other hand, the government bodies are taking initiatives for mass COVID vaccination drives. The businesses are permitted to remain active under precautionary measures. This factor is assisting the construction industry to continue their operations and the green building material market, therefore, is expected to recoup henceforth.
