

# Nano Drones Market Grows At Rate Of 29% With Technological Advancements

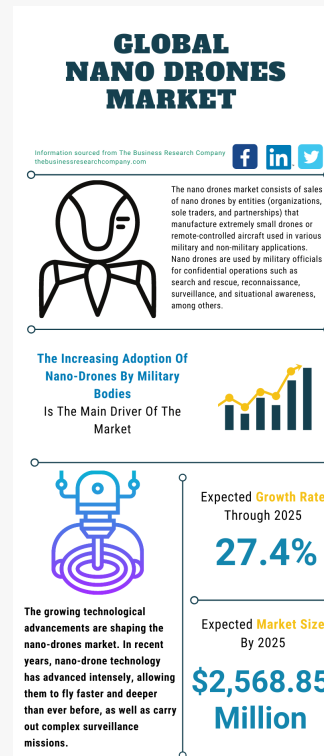

*The Business Research Company's Nano Drones Market Report - COVID-19 Implications And Growth*

LONDON, GREATER LONDON , UK, September 16, 2021 / EINPresswire.com/ -- The growing technological advancements are shaping the nano-drones market. In recent years, nano-drone technology has advanced intensely, allowing them to fly faster and deeper than ever before, as well as carry out complex surveillance missions. For instance, in December 2020, BAE Systems, a UK-based aerospace company in collaboration with UAVTEK, a UK-based drone manufacturer developed a super lightweight bug drone based on nanotechnology. The bug is a nano-unmanned aerial vehicle (UAV) that weighs 196g, about the same as a smartphone, has a 40-minute battery life, and a range of 2 kilometers. During a recent Army Warfighting Experiment (AWE) program conducted by the Ministry of Defence's Future Capability Unit, it was the only nano-UAV capable of surviving the harsh weather.

The global [nano drones market](#) size is expected to decline from \$757.11 million in 2020 to \$974.75 million in 2021 at a compound annual growth rate (CAGR) of 28.7%. The change in growth trend of the

**GLOBAL NANO DRONES MARKET**

Information sourced from The Business Research Company [thebusinessresearchcompany.com](https://www.thebusinessresearchcompany.com)

The nano drones market consists of sales of nano drones by entities (organizations, sole traders, and partnerships) that manufacture extremely small drones or remote-controlled aircraft used in various military and non-military applications. Nano drones are used by military officials for confidential operations such as search and rescue, reconnaissance, surveillance, and situational awareness, among others.

**The Increasing Adoption Of Nano-Drones By Military Bodies Is The Main Driver Of The Market**

**Expected Growth Rate Through 2025: 27.4%**

**Expected Market Size By 2025: \$2,568.85 Million**

The growing technological advancements are shaping the nano-drones market. In recent years, nano-drone technology has advanced intensely, allowing them to fly faster and deeper than ever before, as well as carry out complex surveillance missions.

Major players covered in the global nano drones industry are AeroVironment Inc., Aerix Drone, Extreme Fliers, Drona Aviation Pvt Ltd, Guangdong Cheerson Hobby Technology Co. Ltd, Mota Group Inc., Parrot SA, Prox Dynamics, Skyrocket Toys LLC, Horizon Hobby, Lockheed Martin, Israel Aerospace Industries, Elbit Systems, Dajiang Innovation Technology Co., BAE Systems, The Boeing Company, Thales Group, and Textron.

North America was the largest region in the nano drones market in 2020. Asia Pacific is expected to be the fastest-growing region in the forecast period. The regions covered in the nano drones market report are Asia-Pacific, Western Europe, Eastern Europe, North America, South America, Middle East, and Africa.

TBRC's global nano drones market report is segmented by type into fixed wing nano drones, rotor nano drones, flapping wing nano drones, others, by payload into camera, control systems, tracking systems, others, by end user into consumer, military or law enforcement, others

[Nano Drones Global Market Report 2021](#) - By Type (Fixed Wing Nano Drones, Rotor Nano Drones, Flapping Wing Nano Drones), By Payload (Camera, Control Systems, Tracking Systems), By End User (Consumer, Military Or Law Enforcement), COVID-19 Implications And Growth is one of a series of new reports from The Business Research Company that provides nano drones market overview, forecast nano drones market size and growth for the whole market, nano drones market segments, and geographies, nano drones market trends, nano drones market drivers, restraints, leading competitors' revenues, profiles, and market shares.
