

# Refrigerated Transport Market Report: Analysis of Rising Business Opportunities with Prominent Investment Ratio by 2027

*The refrigerated transport market is projected to grow at a rate of 5.9% in terms of value, from USD 14.80 Billion in 2019 to reach USD 23.10 Billion by 2027*

YORK CITY, NEW YORK, UNITED STATES,  
September 16, 2021 /

EINPresswire.com/ -- According to the current analysis of Reports and Data, the global [refrigerated transport](#)

[market](#) was estimated at USD 14.8 Billion in 2019 and is projected to grow at a CAGR of 5.9% from 2019 to reach 23.1 Billion by the year 2027. Refrigerated transport is associated with temperature-controlled and conditioned freight shipment of perishable food items that include fruits & vegetables, dairy products, confectionery, seafood, fish, and meat. The temperature-controlled system is designed intellectually to keep the food stored within it for longer. An increasing number of small and large food chains across the globe, coupled with the growing Hotel and Restaurant sector, especially across developing economies, are projected to foster the demand for frozen food (raw materials) which is further expected to drive the growth of global refrigerated transport market during the foreseeable years.

Reports And Data

The primary reasons, such as the increasing demand for frozen perishable commodities is one of the factors driving the refrigerated transport market. An increase in the use of advanced cold rooms is expected to augment refrigerated transport market growth over the forecast period. Much of the technological progress in the field of nutraceutical producers will require patience, deep pockets, and a willingness to place risky bets. Refrigerated transport manufacturing companies will need to achieve genuine breakthroughs to tackle a wide range of conditions. Refrigerated transport is likely to benefit from the trend of personalized medicine; therefore, using and creating technology which aids this movement will be a crucial factor.

According to the US Department of Agriculture (USDA) in 2016, China's beef imports increased from USD 275.0 million in 2012 to USD 2.50 billion. This rise is projected to create opportunities in these countries to export beef, thus increasing the demand for refrigerated transport.

The refrigerated transport market is gaining momentum, owing to the escalation in globalization that has led to the growth of trade and a surge in demand for frozen and packaged food across the globe. According to research findings, almost one-fourth of the total global production of goods & services are exported. Emerging cold chain industries across the world, coupled with the introduction of the latest freezing technology and automated frozen systems installed in carrier vehicles, are anticipated to contribute prominently to the extension of the refrigerated transport market. Other significant reasons that are expected to aid the growth of the refrigerated transport market are rise in worldwide demand of frozen food in households, escalating demand of meat products (freezing is an active process to keep meat products free of microbial contamination) and developing foodservice industry. Raised governmental concern regarding the safety of food and regulations on manufacturing, processing, and transportation of frozen food is further assumed to increase the growth of the refrigerated transport market. However, the high capital expenditure required in refrigerated transport can restrict the growth of the market.

The Asia Pacific was one of the largest markets in the global refrigerated transport sector with a market of USD 497.3 million for chilled food products, as well as frozen products. In 2020 it is estimated to be the fastest-growing market. Infrastructure development, along with the improved demand for chilled and frozen foods, is expected projected to create lucrative opportunities for both the service providers of refrigerated transport, service providers as well as for frozen and chilled food companies in the coming years. China and India have been are witnessing a difference in the eating habits of their people.

Further key findings from the report suggest

By temperature, single-temperature held the largest share in 2019. The refrigerated transport market in many countries is now gaining momentum, with the increasing need to cater to the growing demand for perishable commodities. In such states, single-temperature refrigerated vehicles are widely used. They are thus increasing the market for the single temperature refrigerated transport

According to the Direct China Chamber of Commerce (DCCC), the country's total imports are expected to reach USD 3.00 trillion by 2020. Frozen food such as beef, pork, fish, and meat products lead the list of food items to be imported into the country

Nestlé, Tyson Foods, Inc., The Kraft Heinz Company, General Mills Inc., Smithfield Foods, Kellogg Co., Conagra Brands, Inc., Kerry Group, Del Monte Pacific Ltd, Aryzta Ag are some of the major players in refrigerated transport market. In July 2019, Nestlé launched its-YES! Snack bars in a new recyclable paper wrapper. The launch supports the confectionery industry for using recyclable paper packaging

Key Reasons to Buy the Report:

The Refrigerated Transport market report analyzes the global market consumption rate in terms of value and volume.

It comprehensively studies the key segments and sub-segments of the market.

The report presents a detailed study of the intensely competitive landscape of the market.

The report offers vital information on the leading industry players, along with their market values, sales volumes, and business growth strategies.

Furthermore, the report highlights the strategic developments taking place in the global Refrigerated Transport market during the forecast period, such as expansions, agreements, mergers & acquisitions, and new product launches.

## Table of Content:

### Table of Contents

#### Chapter 1. Market Synopsis

##### 1.1. Market Definition

##### 1.2. Research Scope & Premise

##### 1.3. Methodology

##### 1.4. Market Estimation Technique

#### Chapter 2. Executive Summary

##### 2.1. Summary Snapshot, 2018 – 2026

#### Chapter 3. Indicative Metrics

##### 3.1. Macro-Economic Indicators

###### 3.1.1. Rising global demand for refrigerated products

###### 3.1.2. Demand from emerging economies

#### Chapter 4. Refrigerated Transport Segmentation & Impact Analysis

##### 4.1. Refrigerated transport segmentation analysis

##### 4.2. Refrigerated transport market impact analysis

###### 4.2.1. Market driver analysis

###### 4.2.1.1. Increasing international trade of perishable commodities

###### 4.2.1.2. Technological innovations in refrigerated systems and equipment

###### 4.2.1.3. Increased demand for frozen perishable commodities

###### 4.2.1.4. Increase in the use of advanced cold rooms

###### 4.2.2. Market restraint analysis

###### 4.2.2.1. Climate change affecting transportation infrastructure

###### 4.2.3. Market opportunities analysis

###### 4.2.3.1. Intermodal transport to save fuel costs

###### 4.2.3.2. Integration of multi-temperature systems in trucks and trailers

###### 4.2.4. Market challenges analysis

###### 4.2.4.1. Lack of transport infrastructure support in emerging markets and skilled resources in developed markets

- 4.2.4.2. Maintaining product integrity during the transportation of perishable commodities
- 4.2.4.3. Rising fuel costs and high capital investment requirement
- 4.3. Regulatory framework
- 4.4. Porter's Five Force Analysis
  - 4.4.1. Threat of New Entrants
  - 4.4.2. Threat of Substitutes
  - 4.4.3. Bargaining Power of Suppliers
  - 4.4.4. Bargaining Power of Customers
  - 4.4.5. Competitive Rivalry
- 4.5. Refrigerated Transport PESTEL Analysis...

Segments covered in the report:

This report forecasts revenue growth at a global, regional & country level, and provides an analysis of the market trends in each of the sub-segments from 2017 to 2027. For the purpose of this study, Reports and Data have segmented the refrigerated transport market on the basis of mode of transport, temperature, technology, application and region:

Mode of Transport (Revenue, USD Million; 2020-2027)

- Refrigerated Road Transport
  - Refrigerated LCV (Van)
  - Refrigerated MHCV (Truck)
  - Refrigerated HCV (Trailers & Semi-Trailers)
- Refrigerated Sea Transport
- Refrigerated Rail Transport

Temperature (Revenue, USD Million; 2020-2027)

- Single-Temperature
- Multi-Temperature

Technology (Revenue, USD Million; 2020-2027)

- Vapor Compression Systems
- Air-Blown Evaporators
- Eutectic Devices
- Cryogenic Systems
- Cryo-Trans Direct (CTD)
- Cryo-Trans Indirect (CTI)

## Cryo-Trans Hybrid

Application (Revenue, USD Million; 2020-2027)

Chilled Food Products

Milk

Bakery & Confectionery Products

Dairy Products

Beverages

Fresh Fruits & Vegetables

Frozen Food Products

Ice Cream

Frozen Dairy Products

Processed Meat

Fish & Seafood

Bakery Products

Regional Outlook (Volume, Kilo Tons; 2020-2027 and Revenue, USD Million; 2020-2027)

North America

U.S

Canada

Mexico

Europe

Germany

France

UK

Spain

Rest of Europe

Asia Pacific

China

India

Japan

Rest of Asia-Pacific

Middle East & Africa

Latin America

Brazil

Rest of Latin America
