PACE Solutions and Xemplar Partner to offer PACE-Integrated Smartphone Telematics and Policy Services Solutions

WAYNE, PA, UNITED STATES OF AMERICA, September 16, 2021 /EINPresswire.com/ -- PACE Solutions, a provider of policy administration solutions for P&C carriers and MGAs, and Xemplar Insights, a digital transformation company specializing in smartphone telematics and mobile/web customer service solutions, have partnered to provide an integrated solution for P&C insurers and MGAs. This partnership allows mutual customers of PACE and Xemplar to benefit from the collective capabilities of a smart policy administration solution integrated with mobile and web solutions that can help advance the insurer's digital transformation agenda for growth and profitability.

Pace Solutions

"Insurance companies have been struggling with their outdated legacy systems and the extremely high prices to convert or begin a new policy management system. PACE is a state of the art hosted solution that was created to answer the problems of the carriers and MGAs at a reasonable price. Partnering with Xemplar Insights just makes sense to further meet the needs of our customers." Gordon B. Ragan, CEO of Perimeter Software Solutions. (PACE Solutions)

"With mobile apps for policy self-service and Usage Based Insurance (UBI) on the rise, carriers are looking for partnerships between PAS systems and Insurtechs to speed the time to market for new insurance products. PACE and Xemplar have come together to meet this need and take the burden of system integration away from mutual customers" opines SK Tirumala, CEO of Xemplar Insights. He further adds "Xemplar continues to grow its partner eco-system with solutions like PACE to offer nimble and cost-efficient solutions to drive innovation and profitability into the hands of small-to-mid sized insurers and MGAs".
