The dry eye medication market consists of sales of dry eye drugs and other related services by entities (organizations, sole traders and partnerships) that manufacture dry eye medication (or drugs) used to treat dry eyes. The dry eye medication market covers drugs that are used in the treatment of diseases related to dry eyes, irritation, pain, and infection.

Trends In The Global Dry Eye Medication Market

Drug manufacturers are increasingly developing ophthalmic drugs with anti-inflammatory agents to improve treatments for dry-eye syndrome. Anti-inflammatory drugs are widely used for the treatment of the inflammation produced by the disease with the topical corticosteroid drops being the most common therapy. Corticosteroids can rapidly and effectively relieve the symptoms and signs of moderate or severe dry eye. However, prolonged usage of corticosteroids has been seen to produce side effects that include the risk of bacterial or fungal infection, elevated intraocular pressure and cataract formation. As a consequence, NSAIDs are

Dry Eye Medication Market: Global Forecast To 2030

increasingly being used as dry-eye treatment instead of steroids because of their non-severe side effects. For instance, Acix Therapeutics, a US-based pharmaceutical company, is developing NSAIDs which decrease ocular discomfort. Moreover, development of combination therapies for the treatment of dry eye related diseases is an emerging trend in the dry-eye medication market. Combination therapy involves the use of more than one medication or drug to treat a disease. These combinational therapies reduce the frequency of administration of eye drops or drugs, and reduce the possibility of vascular endothelial growth factor (VEGF) expression, choroidal neovascularization and inflammation.
