

# General Lighting Industry Players Increasingly Use Li-Fi Networks For Manufacturing

*The Business Research Company's  
General Lighting Market Report - COVID-19 Impact And Recovery*

LONDON, GREATER LONDON, UK,  
September 17, 2021 /

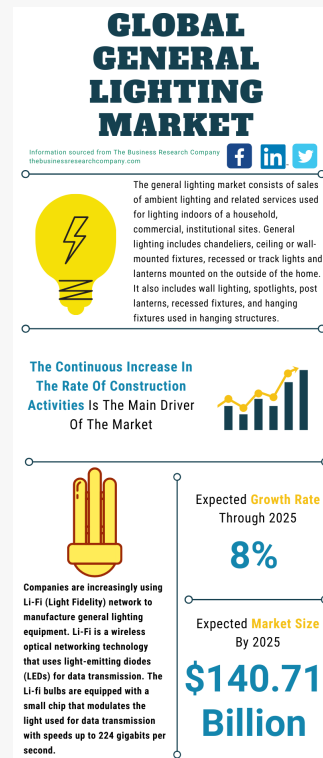

EINPresswire.com/ -- Companies are increasingly using Li-Fi (Light Fidelity) networks to manufacture general lighting equipment. Li-Fi is a wireless optical networking technology that uses light-emitting diodes (LEDs) for data transmission. The Li-Fi bulbs are equipped with a small chip that modulates the light used for data transmission with speeds up to 224 gigabits per second. Keeping up with the trend, in 2018, VLNComm, a USA based provider of Li-Fi technology, launched its LumiNex LED panel. LumiNex LED panel is a Li-Fi-enabled general lighting luminaire that is capable of providing 108Mbps download speed. In 2018, Philips, a Netherland based electrical provider, announced its own Li-Fi platform. The platform is being used by a French real estate investment company Lcade.

The global [general lighting market](#) size is expected to grow from \$99.44 billion in 2020 to \$102.97 billion in 2021 at a compound annual growth rate (CAGR) of 3.5%. The growth is mainly due to
