

# ProClean Pressure Washing West Bloomfield Offering Discounts on Fall Exterior Pressure Washing Services

*Exterior pressure washing services in Michigan are only available seasonally. With winter on the way, ProClean wants to assist as many homeowners as possible.*

WEST BLOOMFIELD TOWNSHIP, MICHIGAN, USA, September 20, 2021 /EINPresswire.com/ -- ProClean Pressure Washing West Bloomfield recently announced that it would be offering discounts to residential and commercial customers seeking services for [pressure washing in West Bloomfield](#). This discount is presently in effect and will run until the end of October. The goal is to encourage homeowners to get their homes cleaned before the winter sets in and takes its toll on homes. Moss, mildew, and algae flourish in the winter months.

Already having this buildup on the home before winter will only add another layer of these microorganisms once the spring arrives. It is dangerous for homeowners to keep such growths on their homes year after year. While these organisms seem like inanimate objects, they are actually alive and eating away at the home's structure. This is especially true for roofs.

Layers of moss and algae buildup can lead to expensive roofing repairs in the future. According to Home Advisor, homeowners could expect to pay between \$366 and \$1,576 for roof repair. However, if they need roof replacement because of extensive roof damage, they can end up paying between \$5,580 and \$11,517. Of course, this price fluctuates up or down according to the specifics of the job. But what most homeowners don't realize is that simply keeping their home

clean minimizes most of these issues.

Some homeowners may be hesitant to get pressure washing in West Bloomfield because they are aware of the damage that it may cause to their property. This is undoubtedly justifiable if homeowners rely on amateur pressure washing services. The professional pressure washers at ProClean Pressure Washing West Bloomfield are licensed and insured. They also have provided exterior pressure washing services in West Bloomfield for over 20 years. The services that they offer are top-rated, and their results are high-quality.

ProClean uses a soft wash pressure washing service. Amateurs tend to use high-powered pressure washers which spray out water at 1300 or more PSI which can knock off paint and shingles on a home. ProClean's soft wash [house pressure washing](#) system is safe and operates at 500 PSI or less, which is the strength of a garden hose. Also, the detergents used are mild and biodegradable, so homeowners don't have to worry about their plants being destroyed.

Fall isn't typically a time that many homeowners get pressure washing services. However, this is one of the most critical times of the year to seek such services to ensure that homes are ready for harsh winter weather. Once cold weather sets in, problems with moss and mold will be exacerbated. By the time spring comes, damage from moss and algae may already be done. So, instead of seeking roof cleaning services, a homeowner may have to seek roof repair or replacement services. ProClean is offering this discount so that homeowners can take advantage of getting their homes cleaned before winter begins.

Not only will roofs be under attack during the winter, but so can gutters. ProClean is also offering this discount to encourage homeowners to get their gutters cleaned. Dirty gutters cause many problems for homeowners. Clogged gutters are places where pests, particularly rodents, set up habitats. Once it gets too cold outside, the next thing they do is find a way to get into homeowners' homes, usually through the roof. This could lead to a pest infestation in the attic of the house.

Clogged gutters can also cause problems with flooding that may lead to foundation problems. Failure to keep gutters clean resulting in foundation problems may lead to insurance companies denying claims. On top of all of these other costly problems, clogged gutters may collect ice during the winter, damaging the gutters by knocking them down. Replacing gutters can cost on average \$1,890.

The roof is one of the most critical focal points that ProClean focuses on to protect homeowners from costly damage. However, another critical focal point is the house siding. Moss and algae can develop on siding, and it is just as destructive here as it is on roofs. These growths can hurt a homeowner's curb appeal leaving a dark film all over the home. But it can also start to cause damage the siding. For brick homes, moss can also be destructive.

Pressure washing services and discounts aren't limited to homeowners in West Bloomfield. ProClean is extending these services to local area businesses, too. Companies must make an

excellent first impression, and dirty exteriors may be causing the wrong impression. Thus, dirty commercial buildings may be scaring off potential customers.

Besides bad curb appeal, local businesses are subject to the same roof and siding damages that homeowners face. The damages from dirty, unkempt commercial buildings aren't just limited to costly repairs, however. These damages can lead to litigation if tenants or their clients are harmed by negligence. Therefore, it is just as critical for local businesses to take advantage of this discount and get their buildings cleaned this fall.

ProClean Pressure Washing West Bloomfield is trying to help homeowners and business owners understand that neglecting something simple as cleaning the property can lead to a domino effect of problems. Taking advantage of the discount this fall can help home, and business owners get their property ready to weather the intense winters that are bound to hit West Bloomfield this winter.
