

Artificial Intelligence in Medical Devices: Austrian Start-up medaia won "Start-up of the Year" with SkinScreener

SkinScreener wins two awards, Start-up-of-the-Year and Audience Award

GRAZ, STEIERMARK, ÖSTERREICH,
September 21, 2021 /

EINPresswire.com/ -- At a spectacular gala of the futurezone Award at the Erste Campus in Vienna, Austria, domestic high-tech ideas and projects were presented with awards:

[SkinScreener](#) won the title "Start-up of the Year" and also the Audience Award.

SkinScreener is an app to easily and quickly assess the risk of skin cancer in skin lesions. The app uses the camera and the flashlight of your smartphone to take a photo of your skin lesions. Then the app is calculating the risk of malignancy using our clinically proved artificial intelligence. SkinScreener can be downloaded free of charge from the Google Play Store as well as from Apple App Store. Two scans are initially provided free of charge to see it working.

The futurezone Award was awarded to ten categories. A jury of experts and the futurezone editorial team selected the winners of the respective categories from numerous submissions of innovative high-tech projects. The winner was selected at the award gala in Vienna and the trophy was presented by Federal Minister Margarete Schramboeck.

This success was made possible by a team of doctors and technicians who have worked intensively on the development of the artificial intelligence and the approval of the app over the last 3 years. A big milestone was achieved when SkinScreener became a CE certified medical device.

SkinScreener wins Start-up-of-the-Year by futurezone

SkinScreener - you are in your skin for life!

“

One in 5 people develop skin cancer. SkinScreener, which is approved as a medical device throughout the EU, provides the user with a cost-effective tool to assess the risk of skin changes anywhere.”
