

Convenient Households & Increase In Working Population Are The Key Reasons For The Growth Of The Dishwashers Market

*The Business Research Company's
Dishwashers Global Market Report 2021 -
COVID-19 Impact And Recovery*

LONDON, GREATER LONDON, UK,
September 21, 2021 /

EINPresswire.com/ -- The increase in the amount of population that is working is expected to increase the demand for dishwasher appliance market. The working population has busy lifestyles, thus have less time to take care of household activities such

as cleaning and washing. This arises the need for the convenient household appliances which save time and energy of households. Also, due to the COVID-19 lockdown, when domestic help was not available, the demand for dishwashers witnessed a sales surge in India. The increase in demand is mostly due to lack of time among working professionals during the lockdown period. For instance, according to Bosch-Siemens CEO in India, there was an over booking of 20,000 dishwashers post the COVID-19 lockdown period in 2020. Therefore, the increase in working population coupled with COVID-19 norms for social distancing has spurred the demand for dishwashers during the period.

The [global dishwasher market size](#) is expected to grow from \$3.69 billion in 2020 to \$3.90 billion in 2021 at a compound annual growth rate (CAGR) of 5.7%. The growth is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The dishwasher market is expected to reach \$4.65 billion in 2025 at a CAGR of 4%.
