

Global Alpha Mannosidosis Market Trends, Strategies, And Opportunities In The Alpha Mannosidosis Market 2021-2030

The Business Research Company's Alpha Mannosidosis Global Market Report 2021: COVID-19 Growth And Change

LONDON, GREATER LONDON, UK, September 21, 2021 / EINPresswire.com/ -- According to the new market research report 'Alpha Mannosidosis Global Market Report 2021: COVID-19 Growth And Change'

published by The Business Research Company, the <u>alpha mannosidosis market</u> size is expected to grow from \$7.50 million in 2020 to \$8.89 million in 2021 at a compound annual growth rate (CAGR) of 18.6%. The growth is mainly due to increasing prevalence of alpha mannosidosis, use of orphan drugs, fee reductions and tax credits, increasing investment in the rare disease treatment and advancements in treatment drugs. The alpha mannosidosis market is expected to reach \$17.91 million in 2025 at a CAGR of 19.1%. The increasing investments on research are expected to contribute to the growth of the alpha mannosidosis market in the forecast period.

The alpha mannosidosis market consists of sales of therapies for alpha mannosidosis (organizations, sole traders and partnerships) that provides treatment for alpha mannosidosis, which is a lysosomal storage disorder. Lysosomes are particles bound in membranes within cells that function as the primary digestive units. Alpha-mannosidosis is a rare genetic inherited condition that affects the organs and tissues of the person suffering from the disease. The treatment therapy focuses on detecting and preventing polysaccharide accumulations within mutant cells, which can cause harm to tissue, organs, and eventually death. Polysaccharides are defined as larger molecules composed of several linked sugar molecules.

Trends In The Global Alpha Mannosidosis Market

The advancements in treatment for alpha mannosidosis like pharmacological therapy are gaining traction in the alpha mannosidosis market. For instance, in 2018 – Chiesi Group, an

international research-focused Healthcare company, announced that it has received a positive opinion recommending the marketing authorization of Velmanase Alfa, under the brand name Lamzede from the European Medicines Agency Committee for Medicinal Products for Human Use. Lamzede is an enzyme replacement therapy intended to provide or supplement natural alpha-mannosidase, an enzyme that helps with the degradation of mannose-rich oligosaccharides and thus prevents their accumulation in various tissues in the body.

Global Alpha Mannosidosis Market Segments:

The global alpha mannosidosis market is further segmented based on therapy type, indication, end-user and geography.

By Therapy Type: Bone Marrow Transplant (BMT), Enzyme Replacement Therapy (ERT), Peripheral Blood Stem Cell Transplantation (PBSCT), Gene Therapy

By Indication: Type I, Type II, Type III

By End-User: Hospitals, Specialty Clinics
