

Polycystic Ovarian Syndrome Treatment Market To Gain Traction of \$4.18 Billion, Growth Opportunities by 2026 | PCOS

The growth of the polycystic ovarian syndrome market is attributed to the rise in prevalence of PCOS disorders across the globe.

PORTLAND, OR, UNITED STATES, September 21, 2021 / EINPresswire.com/ -- UPDATE AVAILABLE ON-DEMAND [Polycystic **Ovarian Syndrome Treatment (PCOS)** Market to Set New Growth Cycle]

Polycystic ovarian syndrome or PCOS is

Polycystic Ovarian Syndrome Treatment (PCOS)

a hormonal disorder that occurs in women during their childbearing age and is characterized by formation of cyst on ovaries. PCOS often leads to hirsutism, obesity, infertility, and diabetes, thus, needs effective management. Presently, there is no cure for PCOS, but different types of medications, such as insulin sensitizing agent, oral contraceptive, antiandrogens, and antiobesity drugs are used to manage PCOS.

The global polycystic ovarian syndrome treatment market size was valued at \$2.90 billion in 2018, and is projected to reach \$4.18 billion by 2026, growing at a CAGR of 4.7% from 2019 to 2026.

Covid-19 Scenario:

 The Covid-19 pandemic and followed by lockdown has affected several manufacturing industries.

• The prolonged lockdown resulted in a disrupted supply chain and increased the prices of raw materials.

• However, as the world has been recovering from the pandemic, the market is estimated to get back on track.

The polycystic ovarian syndrome treatment market is expected to experience significant growth during the forecast period owing to rise in demand for PCOS treatment medication across different regions and increase in popularity combination therapy majorly drives the market growth. Increase in prevalence of PCOS is expected to further boost the polycystic ovarian syndrome treatment market growth during the forecast period. In addition, significant unmet need for PCOS treatment, increase in R&D activities to develop PCOS therapeutics, and growing demand forof PCOS therapeutics in developing countries further creates opportunities for the PCOS treatment market. However, lack of approved drugs and adverse effects associated with off label drugs are anticipated to hamper the market growth.

On the basis of drug class, the market is categorized into insulin sensitizing agent, oral contraceptive, antiandrogens, anti-obesity drugs, and others. Presently, the insulin sensitizing agent segment is the major revenue contributing segment and is estimated to show a significant market growth during the forecast period, owing to higher adoption of insulin sensitizing agents as first line treatment in the management of PCOS.

According to distribution channel, the polycystic ovarian syndrome treatment market is classified into hospital pharmacies, drug stores & retail pharmacies, and online providers. The online providers segment is anticipated to depict significant growth during the forecast period, attributed to the rise in preference for online purchasing of drugs over traditional methods, increase in awareness of online pharmacy, and rise in number of internet users.

North America accounted for approximately one-half of the global polycystic ovarian syndrome treatment market share in 2018 and is expected to remain dominant throughout the forecast period. This was attributed to the rise in adoption of polycystic ovarian syndrome treatment medications, well developed healthcare infrastructure, large number of target population with higher health awareness, wide availability of advanced polycystic ovarian syndrome treatment therapeutics, and supportive reimbursement policies in the healthcare system. In addition, Asia-Pacific is expected to experience the highest growth rate during the forecast period majorly due to growing prevalence of PCOS, and increase in the adoption of polycystic ovarian syndrome treatment medication for the same.
