

FutureVault Achieves SOC 2 Type II Certification

FutureVault announces its successful completion of the Service Organization Control (SOC) 2 Type II audit, earning the SOC 2 Type II certification.

TORONTO, ON, CANADA, September 22, 2021 /EINPresswire.com/ --

[FutureVault](#), an industry-leading document management and Digital Vault Platform for financial services

organizations and enterprises, announced today its successful completion of the Service Organization Control (SOC) 2 Type II audit, earning the SOC 2 Type II certification.

The SOC 2 Type II certification is a complex certification within the SOC protocol, covering day-to-day operations to ensure that FutureVault complies with leading industry security policies and standards for managing enterprise and client data. SOC 2 compliance provides partners, customers, and clients with the assurance that FutureVault operates its infrastructure, tools, and processes to secure their data and information.

“

This milestone is indicative of our commitment to providing our partners, customers, and their clients with best-in-class security and compliance”

Nevin Markwart, Chief Information Security Officer at FutureVault

The report validates the strength and robustness of FutureVault’s internal security, compliance, and technology. Additionally, the SOC 2 Type II report reflects FutureVault’s ongoing commitment to [best-in-class information security](#)

and document management for financial services organizations, professional service providers, and their clients.

“The successful completion of our SOC 2 Type II certification is an incredible milestone for the FutureVault team, validating our commitment to information security and processes,” said Luke Kyleman, Chief Technology Officer at FutureVault. “This milestone is indicative of our commitment to providing our partners, customers, and their clients with best-in-class security and compliance policies to store, manage and protect their information,” adds Nevin Markwart,

FutureVault's Chief Information Security Officer.

The successful completion of the SOC 2 Type II compliance certification continues to position FutureVault as an industry leader in the information management, document filing, and Digital Vault space for financial services and wealth management organizations everywhere.
