

# EvidenceCare Awarded First Patent for Care Utilization Tool, CareGauge

*The patented technology of CareGauge produces real-time cost and variation data directly in the EHR giving doctors visibility into peer-based care patterns.*

NASHVILLE, TN, USA, September 28, 2021 /EINPresswire.com/ -- Following the [recent acquisition of Healthcare Value Analytics](#), EvidenceCare was awarded its first patent for its software, [CareGauge](#), which provides physicians zero-click transparency into care utilization.

The United States Patent and Trademark Office [assigned the patent number](#) 11,056,237 which describes

the technology as a processor-implemented method that creates care

value baselines composed of health metric values for approved plans of care. Physicians can use these health metric values to compare their utilization to their peers' data in the EHR cloud.

"We're thrilled to see our investment in CareGauge pay off with the awarding of this patent," said

“

CareGauge is a powerful tool that puts physicians back in the driver's seat of care utilization and cost."

*Bo Bartholomew, CEO of EvidenceCare*

Bo Bartholomew, CEO of EvidenceCare. "CareGauge is a powerful tool that puts physicians back in the driver's seat of care utilization and cost. The healthcare industry needs this type of technology to ensure better patient care without hurting the already small hospital margins."

The patented technology of CareGauge produces real-time cost and variation data in the form of gauges directly in the EHR. This visibility gives physicians insight into peer-based

care patterns and utilization. EvidenceCare has 3 additional pending patents for the technology behind CareGauge.

“Adding CareGauge to our suite of physician-focused products has proven to be beneficial for hospitals,” said Dr. Brian Fengler, Chief Medical Officer of EvidenceCare. “The key to improving healthcare delivery is real-time data at the point of care. It’s exciting to be bringing products to market that can have this type of meaningful impact.”

#### About EvidenceCare

EvidenceCare is the leading clinical decision support system (CDSS) with an EHR-integrated platform that optimizes clinician workflows to deliver better patient care, reduce hospital costs, and capture more revenue. Founded in response to the professional experience of emergency physician Dr. Brian Fengler, the platform provides clinicians with evidence-based care and measurable outcomes.
