"will you be the voice of the  
American people and  
people all over the world in  
accepting the invitation?"  
*American Citizens*

It will be broadcast worldwide on thousands of media channels and platforms with simultaneous interpreting into more than 100 languages. This unique format is entirely initiated and organized by ordinary people from more than 180 countries.

The goal of the conference is to bring global attention to the true scale of the global disaster and the dangers that

humanity will face in the near future. The need for this vital information to reach a global audience motivates individuals to contribute and perform simultaneous interpreting in 100+ languages on their own.

The international online conference "Global Crisis. Time for the Truth" is a large-scale event organized by volunteers from 180 countries on the platform of the ALLATRA International Public

Movement. It will be broadcast on thousands of media channels worldwide.

The objective of the conference is to inform humankind honestly and truthfully about the scale of the climate and environmental crises, about the impending threats, and the real way out.

Key topics of the conference:

- What is the real climate situation on the planet?
- Why is the global media silent about the scale of the threats?
- Why does the climate continue to change rapidly despite international treaties and agreements which officially stated goal is to curb climate change?
- What is the real cause of global climate change?
- From what risks and global threats have people's attention been diverted?
- What are the environmental consequences of reckless human consumerism?
- Why only in the Creative Society is it possible to stabilize the ecological equilibrium of our planet?
- Why, in the face of planetary cataclysms, the Creative Society is the only way out?

On July 24, 2021, the previous international online conference: "Global Crisis. This Already Affects Everyone," was held with simultaneous interpreting into 72 languages.

Since the time of the previous conference, we have been observing the accelerating progression of climate change. Irreversible changes to the planet are recorded daily. Why is the truth about the real state of our planet being silenced? Why is the truth about the real cause of climate change being silenced? Do we look at the root of the escalating problems? Do we see the real causes of what is happening?

Public figures, researchers, scientists, and experts from various fields will participate in the conference and share their views on the cause of the growing climatic and ecological crises.
