

Caash.io's PayPal-Like Solutions Humanize Cryptocurrency To Ensure Mass Adoption

Crypto in 2021 requires technical understanding while Caash Solutions are meant to be useful, fast, and fun.

LOS ANGELES, CALIFORNIA, UNITED STATES, September 22, 2021

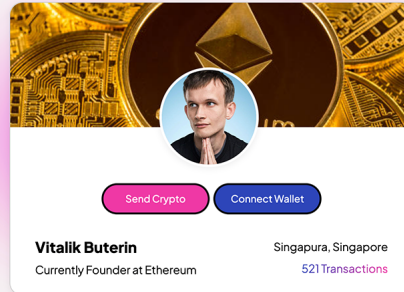

/EINPresswire.com/ -- Caash.io is building an ecosystem of decentralized finance solutions, powered by \$CASH. The first Caash Solution being released in Q4 2021 is [Caash Me](#), so users never send crypto funds to the wrong address again.

Decentralized finance being a new take on banking is powerful, but the user experiences today don't meet the standards of our time. Crypto in 2021 requires some form of technical understanding, yet Caash Solutions are meant to be useful, fast, and fun to use for laymen.

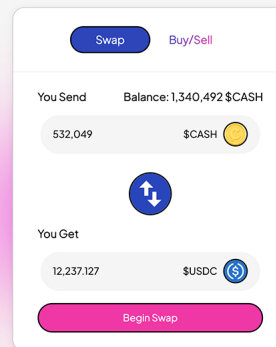

Caash.io is determined to empower users that have never been exposed to crypto to not only feel comfortable, but confident while transacting. With Caash Me, users create their own unique profile link that routes crypto payments to their wallet.

Instead of copying and pasting wallet addresses like thousands of crypto users have done incorrectly over the years, you'll now be able to humanize your wallet address by customizing your link which it's attached to.

"We're simplifying crypto processes by building additional functionality on top of the blockchain to make layman experiences seamless" said one of the three anonymous founders. "Our goal is

Caash Me Demo

Caash Swap Demo

to remove complexities to ensure mass adoption".

Beyond Caash Me, the following Caash Solutions are set to be released: [Caash Swap](#), Caash Pools, Caash Local, and the Caash Cold Wallet. Caash Solutions are the utility. \$CASH is the currency. Join thousands of cybernauts in the [Caash Community](#) on Telegram.

About Caash.io

Caash.io is a tech startup providing decentralized finance solutions that improve upon current systems. Caash was founded by three experienced professionals who believe in the power of T+Instant payment settlements which require the trust of no third parties.
