

# Automated Parking System (APS) Future Scope, Top Key Players and Forecast by 2026

*The Automated parking system (APS) market was valued at USD 1.21 billion in 2018 and is projected to witness a growth of 12.4% of CAGR during the forecast*

NEW YORK, NY, UNITED STATES,  
September 22, 2021 /

EINPresswire.com/ -- The [Automated parking system \(APS\) market](#) was

valued at USD 1.21 billion in 2018 and

is projected to witness a growth of 12.4% of CAGR during the forecast period (from 2018 – 2026). The major drivers of the growths are – Increasing number of vehicles, lesser land for parking, growing demand for green & sustainable parking solutions, strong demand for consumer comfort and convenience, increasing demand for high-rise building, and smart cities initiatives from the government.

An automated parking system (APS) is a mechanical system designed to optimise the area or volume required for parking vehicles. Like a multi-story parking space, an automated parking system (APS) provides parking for vehicles on multiple levels stacked vertically to maximize the available number of parking spaces while minimizing area usage. The automated parking system (APS), utilizes a mechanical system to transport vehicles to and from parking spaces in order to reduce space wasted in a multi-story parking. While a multi-story parking lot is similar to multiple parking lots stacked vertically, an automated parking system (APS) is more similar to an automated storage and retrieval system for cars.

Increasing urbanization is impacting positively the automated parking system market. The demand for premium residential buildings has also increased over the past few years. According to Christie's International Real Estate report, the growth in luxury residential sales was 11% in 2017 and demand for automated parking system is high in luxury residential buildings. Further, according to the research conducted by INRIX (US based company provides location-based data and analytics), American citizen spend an average of 17 hours per year searching for parking space, resulting in a cost of ~\$350 per driver in wasted time, fuel and emissions. Overpaying for

Reports And Data

parking costs American citizen more than \$20 billion a year or ~\$100 per driver. This is likely to fuel the demand of the automated parking system

The European regional market is equally expected to present significant growth opportunities for the automated parking system (APS) market, particularly owing to the favourable government initiatives being pursued by the EU in promoting the deployment of smart parking systems as part of the efforts to reduce the pollution and ensure a sustainable environment.

Further key findings from the report suggest-

Amongst end user segment, the residential apartment segment is estimated to have an attractive growth owing to the increasing demand for automated parking system (APS) in luxury/premium residential apartments, an increasing number of high-rise buildings, and builder's focus to build low to zero emission sustainable residential apartment.

Unlike a palletted system which generally requires two pallets for parking and vehicle handling systems, a non-palletted system requires only one vehicle handling system. It is expected that a non-palletised type of automated parking system (APS) is capable of reducing vehicle parking cycle time by ~35%

Vehicle parking system often has a direct impact on the feasibility of a real estate - residential and commercial projects. The designing of automated parking systems (APS) can help to increase the profitability of the project by offering vehicle parking to be located in areas where conventional vehicle parking would not provide flexibility or offer parking space for lesser number of vehicles

Americans citizen spend an average of 17 hours per year searching for parking spaces, resulting in a cost of ~\$350 per driver in wasted time, fuel and emissions resulting into increasing demand for automated parking system (APS)

Automated parking systems require area about 70% smaller and 50% smaller volume to park the number of cars inside the parking zone as compared to conventional parking facilities.

European region is expected to lead the global automated parking system (APS) market. The acceptance of an automated parking system (APS) is relatively higher in the U.K., Germany, Denmark, Norway, Switzerland, Spain, and the Netherlands.

Rising adoption of an 2/3 automated parking system (APS) is anticipated to optimize the parking alternatives, save room and reduce vehicle emissions while parking

Many companies like Wöhr (Germany), Klaus Multi Parking (Germany), CityLift (the US), Westfalia (Germany), Robotic Parking Systems Inc. (the US), Unitronics (Israel), Kyline Parking AG (Switzerland), Dayang Parking Co Ltd (China) Automotion Parking Systems and other are operating in the automated parking system marketplace

## Key Reasons to Buy the Report:

The report analyzes the global consumption rate in terms of value and volume.

It comprehensively studies the key segments and sub-segments of the.

The report is presents a detailed study of the intensely competitive landscape of the.

The report offers vital information on the leading industry players, along with their values, sales volumes, and business growth strategies.

Furthermore, the report highlights the strategic developments taking place in the global during the forecast period, such as expansions, agreements, mergers & acquisitions, and new product launches.

## Table of Content:

### Chapter 1. Automated Parking System (APS) Segmentation & Impact Analysis

#### 1.1. Automated Parking System (APS) Segmentation Analysis

#### 1.2. Automated Parking System (APS) Market Value Chain Analysis, 2016-2026

#### 1.3. Regulatory Framework

#### 1.4. Automated Parking System (APS) Market Impact Analysis

##### 1.4.1. Market Driver Analysis

###### 1.4.1.1. Increasing number of vehicles

###### 1.4.1.2. Lesser land for parking

###### 1.4.1.3. Smart city initiatives

###### 1.4.1.4. Increasing demand for consumer comfort and convenience

##### 1.4.2. Market Restraint Analysis

###### 1.4.2.1. High installation cost

#### 1.5. Key Opportunities Prioritized

#### 1.6. Automated Parking System (APS) Pricing Analysis

#### 1.7. Industry Analysis - Porter's

#### 1.8. Automated Parking System (APS) PESTEL Analysis

### Chapter 2. Automated Parking System (APS) Market By Automation level Insights & Trends

#### 2.1. Automated Parking System (APS) Automation Level Type Dynamics & Market Share, 2018 & 2026

#### 2.2. Fully-automated

##### 2.2.1. Market Estimates And Forecast, 2016 – 2026 (USD Million)

##### 2.2.2. Market Estimates And Forecast, By Region, 2016 – 2026 (USD Million)

#### 2.3. Semi-automated

##### 2.3.1. Market Estimates And Forecast, 2016 – 2026 (USD Million)

##### 2.3.2. Market Estimates And Forecast, By Region, 2016 – 2026 (USD Million)

### Chapter 3. Automated Parking System (APS) Market By Type Insights & Trends

#### 3.1. Automated Parking System (APS) Structure Dynamics & Market Share, 2018 & 2026

#### 3.2. AGV System

##### 3.2.1. Market Estimates And Forecast, 2016 – 2026 (USD Million)

- 3.2.2. Market Estimates And Forecast, By Region, 2016 – 2026 (USD Million)
- 3.3. SILO System
  - 3.3.1. Market Estimates And Forecast, 2016 – 2026 (USD Million)
  - 3.3.2. Market Estimates And Forecast, By Region, 2016 – 2026 (USD Million)
- 3.4. Tower System
  - 3.4.1. Market Estimates And Forecast, 2016 – 2026 (USD Million)
  - 3.4.2. Market Estimates And Forecast, By Region, 2016 – 2026 (USD Million)
- 3.5. Rail Guided Catt (RGC)
  - 3.5.1. Market Estimates And Forecast, 2016 – 2026 (USD Million)
  - 3.5.2. Market Estimates And Forecast, By Region, 2016 – 2026 (USD Million)
- 3.6. Puzzle System
  - 3.6.1. Market Estimates And Forecast, 2016 – 2026 (USD Million)
  - 3.6.2. Market Estimates And Forecast, By Region, 2016 – 2026 (USD Million)
- 3.7. Shuttle System
  - 3.7.1. Market Estimates And Forecast, 2016 – 2026 (USD Million)
  - 3.7.2. Market Estimates And Forecast, By Region, 2016 – 2026 (USD Million)...

For the purpose of this study, Reports and Data have segmented the industry by automation level, by structure, by type, by design, by system, by platform, by end user, by parking level and by Region:

Automated Parking System (APS) by Automation Level (Revenue, USD Million; 2016–2026)

Fully Automated  
Semi-automated

Automated Parking System (APS) by Structure (Revenue, USD Million; 2016–2026)

AGV System  
SILO System  
Tower System  
Rail Guided Cart (RGC)  
Puzzle System  
Shuttle System

Automated Parking System (APS) by Type (Revenue, USD Million; 2016–2026)

Speedy Tower  
Rotary Carousel  
Optima Parking  
Multi Parking  
Lift and Slide Parking

Automated Parking System (APS) by Design (Revenue, USD Million; 2016–2026)

Hydraulic

Electro-mechanical

Automated Parking System (APS) by System (Revenue, USD Million; 2016–2026)

Hardware

Cameras

Smart Meters

Signage

Parking Gates

Others

Software

Parking Guidance System

Analytics Solution

Automated Parking System (APS) by Platform (Revenue, USD Million; 2016–2026)

Pallated

Non-Pallated

Automated Parking System (APS) by End User (Revenue, USD Million; 2016–2026)

Commercial

Office Building

Mall

Other

Residential

Automated Parking System (APS) by Parking Level (Revenue, USD Million; 2016–2026)

Less than Level 5

Level 5 – Level 10

More than Level 10

Automated Parking System (APS) by Region (Revenue, USD Million; 2016–2026)

North America

US

Canada

Mexico

Europe

Germany  
France  
UK  
Spain  
Italy  
Benelux  
Rest of the Europe

About us:

Reports and Data is a market research and consulting company that provides syndicated research reports, customized research reports, and consulting services. Our solutions purely focus on your purpose to locate, target and analyze consumer behavior shifts across demographics, across industries and help client's make a smarter business decision. We offer market intelligence studies ensuring relevant and fact-based research across a multiple industries including Healthcare, Technology, Chemicals, Power and Energy. We consistently update our research offerings to ensure our clients are aware about the latest trends existent in the market. Reports and Data has a strong base of experienced analysts from varied areas of expertise.
