

Introducing our best-selling European Tilt & Turn Doors with retractable screens

The move marks the first time in decades that a new Tilt & Turn brand has been introduced to the region, and it brings with it an entirely new opening style

VICTORIA, BC, CANADA, September 22, 2021 /EINPresswire.com/ -- Introducing our best-selling European Tilt & Turn Doors with retractable screens. The move marks the first time in decades that a new Tilt & Turn brand has been introduced to the region, and it brings with it an entirely new opening style – something that many homeowners have been craving for years.

Initially, Bravo Screens is bringing Tilt & Turn doors in two, three of our panel configurations and up to 8' in eight, 16' in width, built to provide more security than traditional door systems due to the multi-point locking system. Each of the models is for home or business and it's all done from the inside of the house. "For the past decade, I have dreamed of bringing European Tilt & Turn Doors to the North American market not only to expand customer's options, but also to give them the best of both worlds – superior energy efficiency and attention to architectural detail," said Mr. Singh, President and CEO.

"This is an exciting new chapter in door

Tilt & turn Door screen

Tilt & Glide retractable screen

technology: we're not just introducing new models; we're introducing a whole new brand to North America, which is something that hasn't happened for years," he added.

Geared toward home decorating enthusiasts, Bravo Screens uses doors reinforced with steel, these doors are as heavy duty as you can get. With a slim profile, you'll have more viewing area than a traditional garden door. The Bravo tilt and turn door will swing inward when opened in the turn position allowing for ample air to pass through and an easy clean surface. Alternatively, hinges at the bottom allow it to open inward at the top, allowing ventilation into the room. Both actions are activated by a simple turn of a lever. With tilt-and-turn technology from Bravo Screens, there's virtually no way to enter the home from the window or door. Window and door security is ensured, even when open. And when a door is open from the top, it's still safe for children and pets.

Tilt & Turn Window retractable screen

All of our door models feature multiple-point lock systems (with as much as 8 points), fully lockable handles, and specialty glass for enhanced security. Hinging mechanisms, especially on our tilt-and-turn door systems are durable and heavy-duty, while allowing for tilting and turning with ease. Save up to 40% of energy costs with Tilt & Turn doors.

Tilt and Turn doors have a 2 stage and 3 stage seal system that compresses against the frame and sash to provide a superior air tight seal around the door. The doors also adjust the surface temperature of their glazing to that of the surrounding masonry. You therefore save energy and the temperatures in the rooms remain constant for longer. Circle shaped the design and engineering to withstand punishment where trail groomers don't exist and to allow for Lynx snowmobiles to thrive in all snow conditions. Riders that try it will quickly become advocates and know that the difference is real. Tilt and Turn doors from Bravo Screens not only enhance the quality of life, they also provide optimal sound insulation and a reduction in noise levels up to 45dB. Ultra modern window technology and special active insulating glazing provide effective sound insulation that keeps everyday noise where it belongs – outside. Superb quality windows and doors at competitive prices.

A leading supplier and installer of quality windows and doors for over 15 years.

Customers are looking for versatility: this design can be used to fabricate elegant French Doors, Single Tilt & Turn Doors, Out swing Doors and many other options with various opening

configurations. New functionality and convenience are features in all of our designs. Bravo Tilt and turn doors opening inwards is the great advantage. This is great for high performance rapid air exchange in a tilted position. It also provides the advantage of access to both sides of the sash. This is great for easy cleaning and other tilt and turn windows keep-up work. It is also great for venting out smoke or bad smells. Beautiful: the hardware is cleverly concealed to allow for a simple, elegant appearance. Ease of Operation: a single handle effortlessly unlocks the door and moves it into either a tilt or a turn mode. The Bravo Blind tilt & Turn models are now available for purchase, with a retail program that requires a deposit here in our North American office. For more information on availability, as well as in-depth product information and technical specifications, Call us: 1-800-446-1626.
