

Compression Therapy Market Growth, Global Survey, Analysis, Share, Company Profiles and Forecast by 2028

Rise in the chronic vein disorders, varicose veins and deep vein thrombosis and changing lifestyle are key factors

NEW YORK , NEW YORK, UNITED STATES, September 23, 2021

/EINPresswire.com/ -- According to the current analysis of Reports and Data, the global [Compression Therapy Market](#) valued at USD 3,092.6 Million in

2020 and is expected to reach USD 4,344.3 Million by the year 2028, at a CAGR of 4.30%.

Compression therapy is a therapy where by it acts by increasing the blood flow especially in the lower limbs by strengthening vein support. It intends a gentle application of the pressure to the ankles and legs by compression garments which helps in supporting the legs. It is like an elastic garment whereby generating pressure goes up to the leg. The stockings act as a replicated muscle, its acts by adding some pressure to constricting areas of the legs where there is less flow of blood and to reduce the pain in the lower limbs as the veins loosen up.

Vein disorders leg ulcers, deep vein thrombosis, lymphedema, blood clots and varicose veins they are key drivers to this market. Products, includes stockings, bandages, garments that are being used to treat them. With the rise in the technological advancement and also increase incidence in disease population, compression therapy is gaining importance as it also acts as an OTC product these are the factors are expected to fuel the market for the further growth.

Lack reimbursement for compression therapy products by the government is likely to slow down the market in the forecast period which act as a major restraint to the market.

For the purpose of this report, Reports and Data has segmented the Compression Therapy market on the basis of product and service, technique, application, end user and region:

Product & Service Outlook (Revenue in Million USD; 2020–2028)

Compression Garments

Compression Stockings

Compression Bandages & Wraps

Other Compression Garments*

Compression Braces

Compression Pumps

Other compression garments

Application outlook (Revenue in Million USD; 2020–2028)

Varicose Vein Treatment

Deep Vein Thrombosis Treatment

Lymphedema Treatment

Leg Ulcer Treatment

Other Applications

Technique outlook (Revenue in Million USD; 2020–2028)

Static Compression Therapy

Dynamic Compression Therapy

End- User outlook (Revenue in Million USD; 2020–2028)

Hospitals

Clinics

Ambulatory Surgical Centers,

Home Care Settings

Country-wise regional analysis covers:

North America

Europe

Asia Pacific

Latin America

Middle East & Africa
