## North America Market Projected to Witness Promising Expansion Opportunities

Europe, Asia Pacific, North America, Middle East and Africa, and Latin America are some of the prominent regions for the global electronic health records market. Among all, North America is one of the dominant regions in the market.

The North America electronic health records market is anticipated to gain lucrative avenues in the forecast period 2019 to 2027. This growth can be attributed to many factors such as presence of advanced healthcare infrastructure and increased government as well as non-government organizations' initiatives and support in the form of financial incentives for EHR implementation.

## Global Electronic Health Records Market Segmentation

The report analysts have presented all the data as well as analysis of the global electronic health records market in the form of varied segments, which are decided on the basis of several key aspects such as installation type, end-user, and region. Based on installation type, the market for electronic health records is bifurcated into three parts such as client server based, software-as-a-

service, and web based. Depending on end-user, the electronic health records market is classified into physician office, ambulatory surgical centers (ASCs), hospital, and others.

The study presented here is based on a report by Transparency Market Research (TMR) titled "Electronic Health Records Market (Installation Type - Web-based, Client Server-based, and Software as Services; End Users - Hospitals, Physicians Office, Ambulatory Surgery Centers) - Global Industry Analysis, Size, Share, Growth, Trends, and Forecast 2019 - 2027."
