

Laminating Adhesives Market To Reach \$5.14 billion by 2027, Globally Growing at a CAGR 8.9% : Statistics MRC

Statistics MRC report, Laminating Adhesives Forecasts to 2027 – Global Analysis Application, Key Players, Types, End User and By Geography

MARYLAND, GAITHERSBURG, UNITED STATES, September 27, 2021

/EINPresswire.com/ -- The Global Laminating Adhesives market

accounted for \$2.38 billion in 2018 and is expected to reach \$5.14 billion by 2027 growing at a CAGR of 8.9% during the forecast period. Some of the key factors such as increasing demand from the packaged food industry and rising demand for customer-friendly packaging are driving the market growth. However, the performance limitations of water-based adhesives may restrain the market growth. Moreover, rising demand for flexible packaging industry due to the requirement of lightweight, easy handling, less space-consuming, longer shelf life, easy transit, damage resistance, and better printability packaging will provide ample opportunities for the growth of the market. Laminating Adhesives are used for joining and gathering of various material surfaces. It is specially designed to append or fix two distinct surfaces together. The different chemical compositions of these adhesives include polyurethanes, polyvinyl acetate, epoxy, styrenic block, and ethylene-vinyl acetate. It is generally applicable in minimizing weight, vibration-dampening joint and spillage control of liquids or gases. It has its application in different industrial and domestic uses. Some of the key players in Laminating Adhesives market include Dowdupont Inc., Vimasco Corporation, DIC Corporation, Ashland Inc., H.B. Fuller Company, Henkel AG & Co. KGaA, Flint Group, 3M, Arkema (Bostik), and Coim Group.

Laminating Adhesives Market Global Outlook 2021-2027

Components Covered:

- Two-Component
- One Component

Resins Covered:

- Acrylic
- Polyester
- Polyurethane
- Other Resins

Types Covered:

- Dry Lamination
- Wet Lamination

Adhesive Types Covered:

- Synthetic and Natural Rubber
- Modified Polyolefin
- Ethylene
- Silicone
- Other Adhesive Types

Technologies Covered:

- Radiation Curable
- Solvent-Less
- Combination Radiation Curable
- Solvent-Based
- Hot Melt
- Reactive
- Water-Based
- Other Technologies

Laminating Adhesives report provides an in-depth study and forecast about the industry covering the complete overview of the market that will assist convey clients and business-making strategies. The industry's supply chain and market size, in terms of value, have been derived by extensive research methods. Our report enables readers to understand details of the market, latest trends, key drivers and constraints, opportunities, threats, volume and value forecasts, and various investment opportunities for manufacturers operating in the global and regional markets. Laminating Adhesives report also offers company profiling with detailed strategies, financials, key products, and recent developments along with SWOT analysis of profiled players and Porters five forces for deep insights.

The report offers market monitoring related to a particular area of clients interest and provides up to date information related to strategic initiatives like mergers, acquisitions, partnerships, expansions, product launches for leading companies on a regional scale depending on the clients subscription period for various industries or markets. Our data is constantly updated and

revised by team of research experts so that it always reflects the recent trends and information. We have high experience in research and consulting for different business domains to provide to the necessities of both individual and corporate clients. Our experienced team uses proprietary data sources and different tools and methods to gather and analyze information.
