

# Global Infectious Disease Diagnostics Market Anticipated to Generate Revenue of \$28.79 billion by 2027 - Statistics MRC

*Statistics MRC report, Infectious Disease Diagnostics Market Forecasts to 2027 - Global Analysis Application, Key Players, Types, End User and By Geography*

MARYLAND, GAITHERSBURG, UNITED STATES, September 27, 2021

[/EINPresswire.com/](https://www.einpresswire.com/) -- The Global

Infectious Disease Diagnostics Market

is accounted for \$15.53 billion in 2018 and is expected to reach \$28.79 billion by 2027 growing at a CAGR of 7.1% during the forecast period. Increasing prevalence of infectious diseases, growing R& D activities coupled with the development of novel technologies and rising new diagnostic tests for the control of infectious diseases are the major factors propelling the market growth. However, lack of skilled technicians/professionals and high cost of these devices is hampering the market growth. Infectious disease diagnostics involves identifying the presence of foreign antigen/organism using diagnostic tools such as kits. Any bacteria which cause infectious disease are called pathogens. Diagnosis for the causative organism of bacterial disease is always difficult since infections show symptoms like lethargy and fever. Some of the key players profiled in the Infectious Disease Diagnostics Market are Abbott Diagnostic, Alere, Beckman Coulter , Becton, Dickinson and Company (BD), bioMérieux, Bio-Rad Laboratories, Cavid, Cepheid, Corgenix, Diasorin, Diasonhit , Eiken Chemical, EMD Millipore, J.Mitra, Meridian Bioscience, Roche Diagnostic , Siemens Healthcare Diagnostics, TECHLAB, Thermo Fisher Scientific and Trinity Biotech.

Infectious Disease Diagnostics report provides an in-depth study and forecast about the industry covering the complete overview of the market that will assist convey clients and business-making strategies. The industry's supply chain and market size, in terms of value, have been derived by extensive research methods. Our report enables readers to understand details of the market, latest trends, key drivers and constraints, opportunities, threats, volume and value forecasts, and various investment opportunities for manufacturers operating in the global and regional

Infectious Disease Diagnostics Market Global Outlook  
2021-2027

markets. Infectious Disease Diagnostics report also offers company profiling with detailed strategies, financials, key products, and recent developments along with SWOT analysis of profiled players and Porters five forces for deep insights.

The report offers market monitoring related to a particular area of clients interest and provides up to date information related to strategic initiatives like mergers, acquisitions, partnerships, expansions, product launches for leading companies on a regional scale depending on the clients subscription period for various industries or markets. Our data is constantly updated and revised by team of research experts so that it always reflects the recent trends and information. We have high experience in research and consulting for different business domains to provide to the necessities of both individual and corporate clients. Our experienced team uses proprietary data sources and different tools and methods to gather and analyze information.

Product & Services Covered:

- Assays, Kits, & Reagents
- Instruments
- Software

Test Types Covered:

- Biopsies
- Imaging Test
- Laboratory Tests

Technologies Covered:

- Biochemical Characterization
- Clinical Microbiology
- Conventional Techniques
- DNA Microarray
- DNA Sequencing & Next-Generation Sequencing (NGS)
- Hybridization and Microarrays
- Immunodiagnostics
- Isothermal Nucleic Acid Amplification Technology (INAAT)
- Microscopy
- Molecular Techniques
- POC infectious disease diagnostics test
- Polymerase Chain Reaction (PCR)
