

Pyridine Market Worldwide Industry Analysis and New Opportunities Explored By 2025

Growing demand for pyridine mainly from agrochemical and pharmaceutical industries and increasing use of pyridine as a denaturant in antifreeze mixtures.

OREGON, PORTLAND, UNITED STATES, September 27, 2021 /

EINPresswire.com/ -- According to the report, the global [pyridine market](#) was pegged at \$530 million in 2017 and is anticipated to accrue a sum of \$783 million by 2025, growing at a CAGR of 4.9% from 2018 to 2025.

Increase in demand for pyridine and its derivatives, especially from agrochemicals and pharmaceutical industries due to their multiple chemical functionalities is driving factor of the global pyridine market. Moreover, increased use of pyridine as a denaturant in antifreeze mixtures drives the growth of the market. However, stringent government regulations on the emission of toxic gases during the production of pyridine would hamper the market growth during the forecast period. On the other hand, increase in R&D activities to reduce toxicity of pyridine would provide lucrative opportunities for the market expansion in future.

Pyridine n-oxide segment to hold the largest share through 2025:

The pyridine n-oxide segment captured the highest market share of more than one-third in 2017 and would maintain its dominance through 2025. This is because pyridine n-oxide is extensively used as an oxidizing reagent in organic synthesis. However, the beta picoline segment is projected to grow at the fastest CAGR of 5.2% from 2018 to 2025, as it is extensively used in the agrochemical industry to manufacture chlorpyrifos, which is an organophosphate pesticide. The other types discussed in the study are alpha picoline, gamma picoline, and 2-methyl-5-ethylpyridine (MEP).

Chemicals segment to witness the fastest growth by 2025:

The chemicals segment would witness the fastest CAGR of 5.7% through 2025. This is because pyridine is an important raw material in the chemical industry and is used as a solvent, reagent, and precursor for several chemicals. However, the agrochemicals segment held the largest share in 2017, capturing over one-third of the market share and would maintain its lion's share through 2025. This growth is attributed to the crucial role played by pyridine in the production of fungicides, insecticides/acaricides and herbicides and many more. The report also offers an in-depth analysis of various applications such as pharmaceuticals, food, among others.

LAMEA to be the fastest-growing, Asia-Pacific to generate the highest revenue through 2025:

LAMEA (Latin America, Middle East, and Africa) would manifest the fastest CAGR of 6.2% during the study period, owing to the growing demand for pyridine in agrochemical and pharmaceutical industries. However, [Asia-Pacific was the largest market](#) in 2017, holding nearly 50% of the market share. It is projected to maintain its lead position during the forecast period owing to the growing demand for niacinamide in the pharmaceutical and processed food industries. The other regions analyzed in the report are Europe and North America.

Prominent Industry Players

The leading companies in the global pyridine market include Novasyn Organics, Resonance Specialties Limited, Labex Corporation, LeeChem India Pvt. Ltd., GFS Chemicals Inc., Seidler Chemical Company, Hudson Chemicals, Prochem Inc., Innova Chemicals and Scientific Solutions, LLC., and others.

About Us:

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Portland, Oregon. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.

Pawan Kumar, the CEO of Allied Market Research, is leading the organization toward providing high-quality data and insights. We are in professional corporate relations with various companies and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Each and every data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep

online and offline research and discussion with knowledgeable professionals and analysts in the industry.
