Manager, ProMation
Engineering*

air conditioning, geothermal installations, high-tech construction and energy recovery systems. He has had corporate positions as well as running his own company. He most recently sold his air conditioning energy recovery technology to a leading defense contractor.

While holding numerous high-profile National Sales and Marketing positions, he has successfully sold equipment, systems and entire projects that utilized not only actuators, but valves, pumps, sensors, dampers, and piping. Tom has built and managed sales teams selling various mechanical and technical products and equipment ranging in price from less than \$500 to over \$1,000,000. Tom is a graduate from Purdue University with a Business

and Engineering degree.

“I am excited to be able to join ProMation Engineering”, Tom said. “I feel like I have a substantial leg up in understanding ProMation’s business since I have been not only selling similar products, but purchasing, installing and troubleshooting control equipment as a contractor and installer. I am looking forward continue to grow with ProMation and our customers”.

About ProMation Engineering: ProMation Engineering provides electrical actuators and flow control devices for industrial applications and processes. The products are used in the oil and gas, aerospace, power generation, water treatment, chemical processing, pulp and paper, mining

industries as well as emergency tunnel ventilation systems. Quarter Turn, Spring Return and Linear Actuators range in voltage from 12VDC to three phase 575VAC. ProMation holds standard and hazardous location certifications from CSA for UL, IEC, EN and CSA standards.
