The best tool for stopping the spread of COVID-19 in Sacramento County is through vaccinations. By getting vaccinated, residents help stop the spread of this deadly disease to family, friends, coworkers, and essential workers who continue to work hard to keep our community safe and

open. The risk of hospitalization, serious illness, or death becomes increasingly less and helps keep our hospitals from reaching capacity when vaccinated against COVID-19. With the rising spread of more infectious strains of COVID-19 community-wide protection from the disease is important now more than ever.
