EINPresswire.com/ -- According to the  
new market research report  
[‘Commercial And Service Industry  
Machinery Global Market Report 2021:](#)

[COVID-19 Impact And Recovery’](#) published by The Business Research Company, the commercial and service industry machinery market is expected to grow from \$207.31 billion in 2020 to \$214.21 billion in 2021 at a compound annual growth rate (CAGR) of 3.3%. The growth is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$285.3 billion in 2025 at a CAGR of 7%. Stable economic growth is expected to increase investments in the end user markets, thereby driving the market during forecast period.

Optical instrument manufacturers are offering three-dimensional scanning electron microscopes for high resolution imaging. 3D SEM (Scanning Electron Microscope) generates a high spatial resolution 3D model of a microscopic object. It uses a beam of electrons to scan the surface of an object to create an image detailing the topography and composition of the object's surface. 3D SEM is capable of quantitatively evaluating surface undulations at a height resolution of 10nm. In addition to topographical and compositional information, a 3D SEM can detect and analyze surface fractures, provide information in microstructures, examine surface contaminations, reveal spatial variations in chemical compositions, provide qualitative chemical analyses and identify crystalline structures. 3D SEMs have a variety of applications in aerospace, automotive, medical devices, and semiconductor industry. Major companies manufacturing 3D SEM include CAMECA, Carl Zeiss, FEI Company, Oxford Instruments, and JOEL.

#### Global Commercial And Service Industry Machinery Market Segments:
