The report provides a detailed segmentation of the global Data Center Switch market based on port speed, technology, switch type, industry and region. Based on port speed, the market is classified into 10G and below, above 10G up to 25G, above 25G up to 40G, above 40G up to 100G, and above 100G. Based on technology, the market is divided into Ethernet, InfiniBand, and others. On the basis of switch type, it is categorized into core, ToR switch, and others. On the basis of industry, the market is classified into IT & telecom, government & defense, BFSI, retail, manufacturing, media and entertainment, and others. An extensive analysis of each segment and sub-segment is offered in the research using tabular and graphical formats. This analysis would be valuable in determining the highest revenue generating and fastest growing segments and adopting various strategies to achieve growth during the forecast period.

The research provides a detailed competitive scenario of the global Data Center Switch market for each region. Regions analyzed in the study include North America (United States, Canada and Mexico), Europe (Germany, France, the U.K., Russia and Italy), Asia-Pacific (China, Japan, Korea, India and Southeast Asia), South America (Brazil, Argentina, Colombia), Middle East and Africa (Saudi Arabia, UAE, Egypt, Nigeria and South Africa). The data and statistics are helpful in determining strategies and exploring untapped potential in new markets. AMR also provides customization services for a specific region and segment as per the requirements.
