

# Addiction Treatment Market Growth Is Projected to Expand at a Steady CAGR over the Forecast by 2030

*Currently, around 115 vaccine candidates and 155 molecules are in the R&D pipeline. Moreover, commonly used drugs, such as hydroxychloroquine, have witnessed*

PORTLAND, OR, UNITED STATES,  
September 28, 2021 /

EINPresswire.com/ -- When a person is addicted to a drug and if the person fails to control the urge, they are given

addiction control treatment. This condition is concerned with illegal drugs, nicotine, painkillers, and alcohol. Usage of drugs regularly affects the ability of the brain to function, which leads to failure in controlling the urge to take the drug. This change in the functioning of the brain occurs over some time. Along with the brain functionality, drug addiction also affects impairments in

“

Many treatment centers that have agreements with private recovery facilities have entered the market, thus helping in the expansion of treatment access to a higher number of people in the society.”
