

North America Waste Management Market SWOT Analysis, Dynamics, Drivers, Key Indicators and Forecast to 2027

Due to COVID-19 lockdown, the waste production drastically declined from industries and commercial sector as they were partially or completely shut down.

PORTLAND, OR, UNITES STATES,
September 30, 2021 /

EINPresswire.com/ -- An increase in urban population in Mexico is expected to result in growth in waste generation. In addition, huge amount of waste is being generated from the commercial and industrial sector, which in turn, it

drives of the [North America waste management market](#) growth. For instance, according to the International Solid Waste Association, in March 2017, Mexico produced around 37.5 million tons of waste, which included municipal waste and industrial waste. Further, strict government regulation toward open burning, and illegal dumping, fuels the growth of the market.

The North America waste management market size is expected to reach \$229.3 billion by 2027, from \$208.0 billion in 2019, registering a CAGR of 5.3% from 2020 to 2027. In 2019, the U.S. dominated the market, in terms of revenue, accounting for about 92.45% share of the North America waste management industry, followed by Canada and Mexico.
