

# STP and STC announce the release of its newly developed EHS audit protocol for Switzerland

*Latest EHS Regulations Updates Assist Companies to Achieve EHS Compliance*

VANCOUVER, BRITISH COLUMBIA, CANADA, September 30, 2021 /EINPresswire.com/ -- STP ComplianceEHS (STP) and Specialty Technical Consultants (STC) announce the release of its recently updated EHS protocol for Switzerland. This audit protocol, which covers relevant national EHS requirements, was previously updated in December 2018. The regulatory date for the current release is June 2021.

Leading companies around the world use EHS audit protocols to understand the scope of their EHS regulatory obligations and rapidly collect, share, archive, and export audit findings in a cost-effective manner. EHS audit protocols are prepared by STC in partnership with STP and continue to focus on those national (plus, in some cases, regional or provincial) EHS requirements that have site-specific applications for manufacturing operations. As a leading EHS management consulting firm with a global network of experienced EHS teaming partners, STC has in-depth knowledge and technical expertise of local/regional EHS requirements.

STP and STC maintain leading-edge EHS audit protocols for more than 50 jurisdictions. The protocol documents are written in English and are available in MS Word, Adobe Acrobat, and Excel formats, as well as through STP's web-based portal or can be integrated into an existing company platform. Using the protocols' custom templates and advanced functionality features, auditors can easily track audit findings and manage data over time to improve compliance, risk management, and safety performance. In addition, STP's formatting is compatible with leading risk management and sustainability platform providers.

Highlights of selected legislation covered in the newly developed protocol include:

Federal Act on Approval and Implementation (Amendment of the CO2 Act) of the Agreement between Switzerland and the European Union on the Coupling of Their Emission Allowance Trading Systems (CO2 ETS Act), of 22 March 2019 establishes provisions on greenhouse gases (GHGs) and the Emission Trading Scheme.

European Agreement Concerning the International Carriage of Dangerous Goods by Road (ADR 2021), 30 September 1957 as amended through 1 January 2021 establishes rules for the movement of dangerous goods by road that are applicable to those European States that have

agreed to the ADR (most of the European States/Countries). This 2021 version of the Agreement replaces the 2019 version of the Agreement.
