

Water Clarifiers Market Size Is Likely To Reach Valuation of around USD 9.38 Billion by 2026 – Reports and Data

The developing need for cleaning water owing to the rise in industrial effluents and growth in population is propelling the market growth

NEW YORK CITY, NY, UNITED STATES, October 1, 2021 /EINPresswire.com/ --

The global [water clarifiers market](#) is forecast to reach USD 9.38 Billion by 2026, according to a new report by

Reports and Data. Water Clarifiers are unique compounds that are used for cleaning effluents as well as for clean potable water. These chemicals are either coagulating, flocculating, or pH stabilizing in nature. They provide neutral water that is not harmful to the environment or for consumption. This ensures that the consumers are receiving the highest quality of water supply, and water-borne diseases are nipped before the spread occurs.

The market for Water Clarifiers is influenced by the rising demand for treating water that is meant not only for drinking but wastewater too. These mild coagulating agents form lumps around the impurities, helping in trapping them while they are passed through filters. The water clouding particles are mostly negatively charged. Thus, clarifiers are positively charged in order to attract these clouding agents, rendering the water clear visually. These compounds help in the removal of sediments, algae, fine particles, colors, oil, and some organic matter, among other impurities.

Restricting the market growth, the most pressing cause is that of the acceptance of alternative forms of water treatment. Reverse Osmosis filtration and UV technologies provide for cheaper solutions for the treatment of dirty water. The heavy demand for clarifiers from the rapid urbanization that is occurring and the requirement for proper treatment of wastewater is creating a high demand for water clarifiers globally.

The region of Asia Pacific has been utilizing clarifiers because of the increasing number of industries booming in this region. Most of the developing countries are focusing on India and China as the global market leaders where research and development of technology are occurring

Reports And Data

swiftly. With the depletion of freshwater is fuel the growth of the market from industrial as well as municipal sectors in this region.

Key participants are Napier-Reid, BASF SE, Pall Corporation, Ecolab Inc., Solenis LLC, Buckman Laboratories Inc., Ixom Operations Pty Ltd., Suez S.A., Dew Speciality Chemicals, and Holland Company Inc., among others.

Further key findings from the report suggest

- The segment for coagulant is seen to have held the largest market share of 36.3% in the year 2018. This is because of their low-cost and their wide application areas. Coagulants are responsible for neutralizing the negatively charged particles present. Coagulants include aluminum salts, iron salts, and polyelectrolytes.
- Flocculant in the compounds segment is set to witness a CAGR of 6.3% during the forecast period. This is due to the increased usage of clean drinking water. Flocculation refers to a process where fine particles clump together and are easily removable by creaming or sedimentation.
- Potable Water Treatment held the second largest market share of 18.4% in the year 2018. Increasing requirement of clean water among the population for drinking is driving this segment. Various organizations and governments are funding resources into the research for providing clean water to the population.
- Asia Pacific is estimated to grow with the highest CAGR of 8.6% during the forecast period. Countries like India, China, and Japan are rapidly catching up with the growth in the water clarifier market. The demand from industries and municipalities for utilization of clarifiers is generated by the strict regulations put forward by the international authoritative bodies in order to safeguard the environmental standards and human health.

Market Overview:

Power and energy industry comprises of key companies operating in fuel, petroleum, natural gas, and nuclear power markets. Constant production of energy and power is imperative for country's economic growth. It also covers exploration and production of oil and gas reserves, oil and gas drilling, and refining industries. Power and energy sector is one of the most diversified sector across the globe. Rapid industrialization and urbanization has increased the dependency on power and energy and industries today consume large amounts of fuel making energy industry a crucial element of today's industrial infrastructure.

For the purpose of this report, Reports and Data have segmented into the global Water Clarifiers

Market on the basis of compound type, application type, end-users, and region:

Compound Type Outlook (Volume, Kilo Tons; Revenue, USD Billion; 2016-2026)

- Coagulant
- Flocculants
- pH Stabilizers
- Others

Application Type Outlook (Volume, Kilo Tons; Revenue, USD Billion; 2016-2026)

- Pre-Treatment
- Portable Water Treatment
- Wastewater Treatment
- Wastewater Recovery
- Utility Feed Water
- Others

End-Users Outlook (Volume, Kilo Tons; Revenue, USD Billion; 2016-2026)

- Power Generation
- Mining
- Municipal
- Food Processing
- Pulp & Paper
- Oil & Gas
- Others

Regional Analysis Covers:

North America (U.S.A., Canada, Mexico)

Europe (U.K., Italy, Germany, France, Rest of Europe)

Asia Pacific (India, Japan, China, South Korea, Australia, Rest of APAC)

Latin America (Chile, Brazil, Argentina, Rest of Latin America)

Middle East & Africa (Saudi Arabia, U.A.E., South Africa, Rest of MEA)

About Us:

Reports and Data is a market research and consulting company that provides syndicated research reports, customized research reports, and consulting services. Our solutions purely focus on your purpose to locate, target and analyze consumer behavior shifts across demographics, across industries and help client's make a smarter business decision. We offer market intelligence studies ensuring relevant and fact-based research across a multiple industries including Healthcare, Technology, Chemicals, Power and Energy. We consistently update our research offerings to ensure our clients are aware about the latest trends existent in the market.
