

Global Medical Lasers Market Trends, Strategies, And Opportunities In The Medical Lasers Market 2021-2030

*The Business Research Company's
Medical Lasers Global Market Report
2021: COVID 19 Growth And Change to
2030*

LONDON, GREATER LONDON, UK,
October 1, 2021 /EINPresswire.com/ --
According to the new market research
report '[Medical Lasers Global Market
Report 2021](#) – COVID-19 Growth And

Change' published by The Business Research Company, the medical lasers market size is expected to grow from \$4.99 billion in 2020 to \$5.54 billion in 2021 at a compound annual growth rate (CAGR) of 11.1%. The growth is mainly due to the companies resuming their operations and adapting to the new normal while recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$8.65 billion in 2025 at a CAGR of 12%.

The increased demand for minimally invasive procedures contributed to the medical lasers market's growth during the period. The surge in aesthetic and cosmetic procedures propelled the demand for minimally invasive surgeries worldwide. Thus, the high usage of medical lasers to perform minimally invasive aesthetic and cosmetic surgeries increases the demand for medical lasers.

The medical lasers market consists of sales of medical lasers and related services by entities (organizations, sole traders, and partnerships) that manufacture medical lasers. Medical lasers are devices that treat or remove tissues using precisely focused light sources. Medical lasers find their applications in several surgical procedures including eye surgery, cosmetic surgery, dental procedures, and other general procedures.

Trends In The Global Medical Lasers Market

Major players operating in the market are focusing on developing new innovative products with advanced techniques in order to serve the healthcare professionals and their patients better. For instance, in April 2019, Lumenis Ltd., an energy-based medical device company based in Israel, introduced Legend Pro+, a new skin rejuvenating technology and a unique multi-application platform powered by clinically proven and complementary technologies. Similarly, in July 2019, Ra Medical Systems, a USA-based medical laser company, announced the launch of Pharos, a new dermatology excimer laser for the treatment of psoriasis, atopic dermatitis, and vitiligo. Pharos offers better comfort and visibility of the treatment site and is designed to improve physician and patient experience.

Global Medical Lasers Market Segments:

The global medical lasers market is further segmented:

By Product Type: Solid State Laser Systems, Gas Laser Systems, Dye Laser Systems, Diode Laser Systems

By Application: Surgical, Cosmetic, Dental

By End Use: Ophthalmology, Dermatology, Gynecology, Dentistry, Urology, Cardiovascular, Other

By Geography: The global medical lasers market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.
