The synthetic dyes market consists of sales of synthetic dyes and related services used in the field of textile, paint, and printing to provide long-lasting coloring benefit. Synthetic dyes are predominantly organic (carbon based) chemical compounds that are generally derived from petrochemical derivatives. A dye is a colored substance that has an affinity to the substrate to which the dye is applied. Dyes are applied in an aqueous solution and may require a mordant to make them fast on the fiber. Synthetic dyes are used to impart color to paper, textiles, leather and other materials. Eosin Y, fast green, basic fuchsin, aniline blue, methylene blue, and orange G are examples of synthetic dyes.

Trends In The Global Synthetic Dye Market

Range of high wet-fast disperse dyes is trending in the synthetic dyes market. High wet-fast disperse dyes are suited for coloring polyester fibers, microfibers, and polyester/elastane blends
