Top Software Testing Companies_GoodFirms

“

a1qa is recognized for providing the most excellent Q.A. solution to test and have more control over the software production process.”

GoodFirms Research

GoodFirms is an internationally recognized B2B research, ratings, and reviews platform. It builds a bridge for service seekers to associate with the best software and I.T. development companies effortlessly. The research team of [GoodFirms.co](#) conducts a profound assessment to evaluate each firm following three main key factors: quality, reliability, and ability. Further, these elements are subdivided into several metrics, such as determining the complete portfolio, years of experience, market penetration, and client reviews.

Hence, all the service providers obtain the scores focusing on metrics and then get indexed in the list of top software companies.

a1qa has achieved this remarkable place at GoodFirms for delivering top-notch quality

assurance and software testing services for mobile, web, and desktop apps. It includes PPAs or custom-developed software deployed to any environment on different flavors of Agile, from simple ones to SAFe.

Check Out a Couple of Reviews for a1qa:

We chose A1QA as our software testing partner to prepare our EHR solution for HIPAA and ONC certification. A1QA assigned their HIPAA-certified testing engineers who made up a testing plan according to the regulations and carried out the full-cycle testing according to the certification requirements. As we were delighted with the delivered results, we also engaged A1QA's team in the functional testing of the EHR system.

With this positive experience in mind, we plan to involve A1QA in our future software testing projects. - by Shoshana Parker (Senior Computational Biologist at SBH Health System).

A1QA managed to guide us through the project roadmap expertly and explained all technicalities. It also helped that they sent us reports daily without fail. As the project owner, I came to cooperate with A1QA most of all and can say I'm positively impressed with their speed and quality. They showed excellence in manual and automated tests, which were hard to pull off considering the number of integrations our system has throughout our entire suite of enterprise applications. - by Robert Hager (Chief Business Analyst at Simpson Strong-Tie).
