

# Food Waste Recycling Machine Market- Restaurants to Stay at the Forefront of Demand as Enhancing Profitability

*Far-reaching Proactive Efforts to Cut Back on Food Waste- a Precursor to Growth*

ROCKVILLE, MARYLAND, UNITED STATES, October 5, 2021

/EINPresswire.com/ -- Fact.MR's recent study on food waste recycling machine market foresees a promising growth, driven by proactive initiatives for fostering environmental sustainability. An amalgamation of pivotal aspects, ranging from launch of legislation around food waste to rising proclivity for recycling activities, is anticipated to underpin growth potential of the market. [Global sales of food waste recycling machines](#) are likely to reach 10,890 units in 2018, up from 10,356 units in 2017.

The Fact.MR research study opines that the demand for food waste recycling machine has taken off in recent years, as a result of challenges associated with traditional composting methods. Rapid gravitation toward minimizing disposal costs and curbing noxious emissions have been identified as key drivers.

Restaurants to Stay at the Forefront of Demand as Enhancing Profitability Gains Momentum Shift from landfills to waste-to-energy plants is evolving as a prominent waste management trend, which is offering numerous opportunities for the food waste recycling machine manufacturers.

Sales of food waste recycling machine have remained concentrated in the restaurants industry, driven by efforts to scale up their bottom lines. This buoyancy of restaurants in the food waste recycling machine market continued in 2018 as well, with volume sales likely to exceed 2,500 units. Sales are also complemented by growing adoption in hotels and supermarkets, according to the study.

North America maintains its lead as the largest food waste recycling market, with volume sales set to surpass 3,000 units in 2018. Attempts to foster recycling activities have taken off at the federal level in the U.S. and Canada, in the wake of a huge ratio of food wastage per capita. APEJ and Europe are likely to be the second and third most attractive market, owing to sweeping concerns for efficient food waste management, estimates the research study.

The food waste recycling machine market has a wide-spread presence of small and unorganized players, with consolidation of regional presence being their key strategic lever. The top 5 players hold around 20% of the revenue share and are focused on commercialization of small capacity machines, especially 0-50 kg/day' and '50-100 kg/day'. These players are focusing on new product development and facility expansion in a bid to retain their buoyancy in the market space, finds the report.

Manufacturers to Thrive on Untapped Opportunities with Value-based Offerings

The manufacturers of food waste recycling machine are focusing on fostering their foothold with value-based offerings, unveils Fact.MR study. For instance, Whirlpool introduced 'Zera Food Recycler', which converts the food scraps into organic fertilizers in a time span of 24 hours. This offering has been introduced with the pervading trend of converting food waste into reusable commodities.

The demand for food waste recycling machine in emerging regions is growing at a healthy rate; however, bulk of the sales remain concentrated in China and India. The cost-sensitivity of end-users in emerging regions of Africa and Latin America, combined with lax regulations on food recycling, have meant that sales have remain limited in these markets.

"Large-scale machines, comprising of high power consuming components in their peripheries, are highly likely to witness a substantial decline in demand amid the end-users, posing challenges for the growth trajectory", Senior Analyst, Fact.MR

The Fact.MR research study analyzes the growth of food waste recycling machine market for the period of 2018 to 2028. As per the report, the market is likely to proliferate at a CAGR of 7.1%

through 2028.

Explore Fact.MR's Coverage on the Industrial Goods Domain –

[Construction Equipment Market](#)- Construction equipment is particularly built gear utilized in a variety of industries, including mining, construction, ports, manufacturing, and forestry, to name a few. With an increase in government spending in infrastructure development projects in both developed and developing countries, demand for construction equipment is expected to go up. Furthermore, government initiatives to construct motorways, dams, trains, and roads as part of the development of smart cities in the areas of energy, mobility, and government are expected to stimulate construction equipment sales in the near future.

[Glass Forming Machine Market](#)- Demand for the device will continue to be driven by end-user demand for glass products or containers for a variety of applications. Glass forming producers continue to profit from applications in the food and beverage industry. In the glass industry, the individual section machine, or IS machine, is the most often used forming machine arrangement. Manufacturing machine sales are seeing strong demand, which has been a long-standing challenge for producers. Glass forming machines are also widely utilized in the production of large quantities of glass products for end-use industries.

About Fact.MR

Market research and consulting agency with a difference! That's why 80% of Fortune 1,000 companies trust us for making their most critical decisions. We have offices in US and Dublin, whereas our global headquarter is in Dubai. While our experienced consultants employ the latest technologies to extract hard-to-find insights, we believe our USP is the trust clients have on our expertise. Spanning a wide range – from automotive & industry 4.0 to healthcare & retail, our coverage is expansive, but we ensure even the most niche categories are analyzed. Reach out to us with your goals, and we'll be an able research partner.
