“

Critical Care Nutrition Market by Route of Administration (Enteral and Parenteral), Application (Cancer, Neurological Diseases, Gastrointestinal Disorders), & Age Group (Pediatric, Adults, & Geriatric)”

*Allied Market Research*

Critical care nutrition offers the nutrition support therapy for critically ill patients to gain positive patient outcomes. Critical care is the provision for safer and appropriate nutrition, which needs to be provided to patients admitted in the ICU that requires evidence-based practice. The critical care nutritional therapy is approved to patients suffering from chronic illness such as gastrointestinal disorder and cancer. In addition, the nutrition therapy, if taken in early stages, may assist in decreasing the disease severity and reduce complications that are caused due to insufficiency of nutrition. Furthermore, decrease in length of stay in the ICU and decline in the rate of mortality in patient population, who have undergone early nutritional

therapy are expected to support the market to generate higher revenue during the forecast

period.
