

The Oxygen Concentrators Market Grows At Rate Of 12%, Supported By Increasing Prevalence Of Respiratory Disorders

The Business Research Company's Oxygen Concentrators Global Market Report 2021 – COVID-19 Implications And Growth

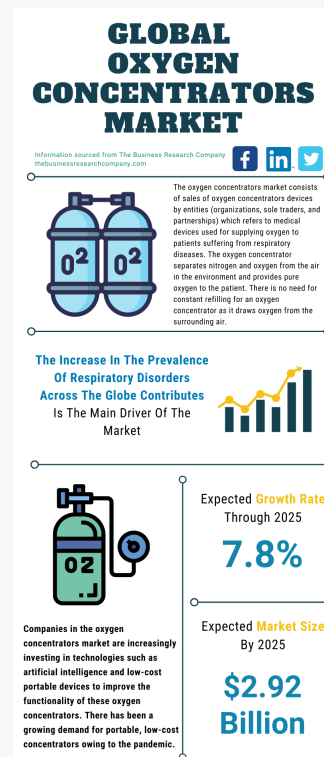

LONDON, GREATER LONDON, UK, October 7, 2021 /EINPresswire.com/ -- The increase in the prevalence of respiratory disorders across the globe contributes to the growth of the oxygen concentrators market. Globally, asthma and chronic obstructive pulmonary disease (COPD) are the most common chronic respiratory diseases. According to the Forum of International Respiratory Societies (FIRS), 384 million people suffer from COPD and 3 million people die every year. According to the Centers for Disease Control and Prevention's National Health Interview Survey, in 2019 in the USA, 4.6% of adults had suffered from COPD, emphysema, or chronic bronchitis. Respiratory disorders need the additional flow of oxygen. The oxygen concentrator provides the required oxygen by producing it from the environment. Therefore, the increase in the prevalence of respiratory disorders is driving the growth of the oxygen concentrators market.

Global Oxygen Concentrators Market, Forecast Market Size, 2020 – 2025, \$ Billion
