Covid-19 Scenario:

- 1) The Covid-19 pandemic and followed by lockdown has affected several manufacturing industries.
- 2) The prolonged lockdown resulted in a disrupted supply chain and increased the prices of raw materials.
- 3) However, as the world has been recovering from the pandemic, the market is estimated to get back on track.

The global respiratory care devices market is driven by factors such as increase in prevalence of respiratory diseases, rapid urbanization, rise in pollution level, growth in geriatric population, and increase in tobacco consumption worldwide. In addition, governmental support has fueled the market growth. Moreover, high demand for therapeutic devices in homecare settings and increased healthcare spending are anticipated to provide lucrative opportunity for the market players. However, large pool of undiagnosed population and risks associated with certain therapeutic devices for neonates hamper for the growth of the respiratory care devices market.

The inhalers segment accounted for the major share in the respiratory care therapeutic devices market, and is expected to continue its dominance throughout the forecast period. This segment is expected to grow at a CAGR of 7.1% during 2016-2022, owing to high prevalence of respiratory diseases such as COPD and asthma among all age groups.

In 2015, North America accounted for nearly half of the global market, owing to the high prevalence of various respiratory diseases in the region. Europe holds the second position in the respiratory care devices market, accounting for two seventh share in 2015.
