

Catapult Systems Achieves 10th Microsoft Advanced Specialization solidifying position as a top Microsoft US partner

Catapult has achieved its tenth Microsoft Advanced Specialization, placing them among Microsoft's most decorated US systems integrator partners.

AUSTIN, TEXAS, UNITED STATES, October 7, 2021 /EINPresswire.com/ -- [Catapult](#), a digital solutions and services firm, is pleased to announce it has achieved its tenth Microsoft Advanced Specialization, a key measure of technical prowess in the Microsoft cloud, placing them among Microsoft's most decorated US systems integrator partners.

Achieving even a single advanced specialization is a significant achievement within the Microsoft partner ecosystem, as they are challenging to qualify for and are only awarded to Microsoft Partners with deep technical knowledge and expertise in specific solution areas. Advanced specializations require demonstration of expertise and high standards of delivery and support through a gold-level Microsoft competency in the business area, subject-matter employee certifications, customer references and often require passing a third-party audit demonstrating evidence of hands-on experience and proven success.

"I am proud to say that we have now achieved 10 Microsoft Advanced Specializations. These Specializations and our 17 competencies demonstrate Catapult has the highest level of expertise and experience in the Microsoft cloud," said Terri Burmeister, Catapult President. "This achievement is proof of our world-class delivery team's level of knowledge, talent, and commitment to our customers and to Microsoft."

Catapult's Advanced Specializations:

- Access Management
- Adoption and Change Management
- Analytics on Microsoft Azure
- Calling for Microsoft Teams
- Meetings and Meeting Rooms for Microsoft Teams
- Microsoft Information Protection and Governance
- Modernization of Web Applications to Microsoft Azure
- Teamwork Deployment
- Threat Protection and Identity
- Windows Server & SQL Server Migration to Microsoft Azure

Catapult maintains 15 Microsoft gold competencies and 2 silver competencies, ranging from application development, data analytics, security, cloud productivity, and more. For a full list of recognitions, [click here](#).
