What recent investors are saying!

David L.

"Fossil fuels will continue to play an important role in the coming decades, especially with improvements in fuel efficiency coupled with significantly reduced emissions. Technologies that can power vehicles with little or no emissions and not requiring significant infrastructure would be big winners."

John W. L.

"I have a long-time interest in the energy sector and techniques by which we can conserve

energy sources."

Stephen L.

"Reducing fuel emissions is increasingly important and with significant public/private investment behind it but will take decades to make the full transition to EV and other technologies so this definitely can fill in a much-needed gap."

These are just a few comments from our investors, but we've raised \$1.2 Million from our 93 investors to date. See what all the excitement is about by watching our corporate video at <https://fundify.com/s/the-hydrogen-group/d292f19f/pitch>.
