

VAIS Technology's Satellite Radio Adapter Kits for Factory Stereo Available Online

An industry leader for vehicle technology has expanded its online store.

ENGLEWOOD, COLORADO, UNITED STATES, October 8, 2021

/EINPresswire.com/ -- Representatives with [VAIS Technology](#) announced today that its Satellite Radio Adapter [Kits](#) for factory stereo are now available online.

"We invite you to use one of our kits to add satellite radio to your original factory radio," said Dennis Hopper, executive vice president and spokesperson for VAIS Technology, which won the Best Mobile Electronics Product Award at the SEMA show, the largest Automotive Aftermarket show in the world, where 1,300 products are entered to win the award for 16 different categories.

Available kits feature:

- Factory Functionality. Change satellite radio stations with your factory radio controls.
- True Sound Quality. Our kits preserve satellite's audio quality (no FM transmitters).
- Eliminate clutter. Our system doesn't have a bunch of wires going everywhere. There are no brackets to add to your dash, and nothing to plug into your cigarette lighter.

"Don't settle for a sub-par satellite radio setup," Hopper stressed before adding, "Get a [VAIS Technology Adapter Kit](#) today."

The addition of VAIS Technology's Satellite Radio Adapter Kits for factory stereo comes on the heels of VAIS Technology's SEER smart keyless access system for classic vehicles (<https://www.fuelcurve.com/goodguys-2021-best-new-product-winners/>) being featured in the GoodGuys 2021 Best New Product Showcase.

Hopper explained that the company's SEER – Smart Entry Exit Recognition - automation system for classic vehicles was recognized at Good-Guys Nationals with "Best Electrical Product" award.

Based on proximity, SEER can automatically lock your car, keep the lights on as you are leaving, and turn them off once you're gone, turn the lights on when you approach, and unlock your doors before you touch the handle.

VAIS Technology, a SEMA member, SEMA Pro member, Mobile Electronics Association (MEA) member, aims to adapt today's vehicle technology for the everyday car. Besides SEER, the company's two product lines help vehicle owners add satellite radio to their standard factory stereo and add Bluetooth audio to their standard factory stereo.

"Our vehicle enhancement products are preferred by auto dealers and vehicle customization professionals because they do not alter any existing factory equipment," Hopper said, before adding, "When you add a VAIS Technology product to your car, you can rest assured that your factory-installed stereo will remain under factory warranty."

About VAIS Technology

VAIS Technology was founded in 2003, at a time when vehicle technology was evolving. We have a passion for both automobiles and technology, so our goal is to provide consumers with tech features that automakers haven't yet embraced or have implemented only on higher trim packages.
