

Global Powder Coatings Market Size And Powder Coatings Market Growth Opportunities

The Business Research Company's Powder Coatings Global Market Report 2021: COVID-19 Impact And Recovery To 2030

LONDON, GREATER LONDON, UK, October 11, 2021 /EINPresswire.com/ -- According to the new market research report '[Powder Coatings Global Market Report 2021: COVID-19 Impact And Recovery](https://www.thebusinessresearchcompany.com/sample.aspx?id=2681&type=smp)' published by The Business Research Company, the powder coatings market is expected to grow from \$22.11 billion in 2020 to \$24.39 billion in 2021 at a compound annual growth rate (CAGR) of 10.3%. The growth is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$30.98 billion in 2025 at a CAGR of 6%. The limitations on products that generate high VOCs promote the sales of powder coatings thereby driving the market.

The powder coatings market consists of sales of powder coatings. Powder coating is a finishing process and keeps the binder and filler parts in a liquid suspension form.

Trends In The Global Powder Coatings Market

Companies are now focusing on a new coating technology for heat sensitive substrates such as medium density fiberboard (MDF). This technology consumes low power as the curing process is done in lower temperature compared to the conventional method. For instance, IGP-RAPID released by IGP are based on new raw materials combined with IGP technology and enables a low-temperature powder coatings at 266°F (130°C) and curing times of 3 minutes. This technology is ecological, enhances product design, and provides long-term functional protection.
