

# Household Refrigerator And Home Freezer Market Incorporates Advanced Technology For Smoother Functionality

*The Business Research Company's Household Refrigerator And Home Freezer Global Market Report 2021 - COVID-19 Impact and Recovery*

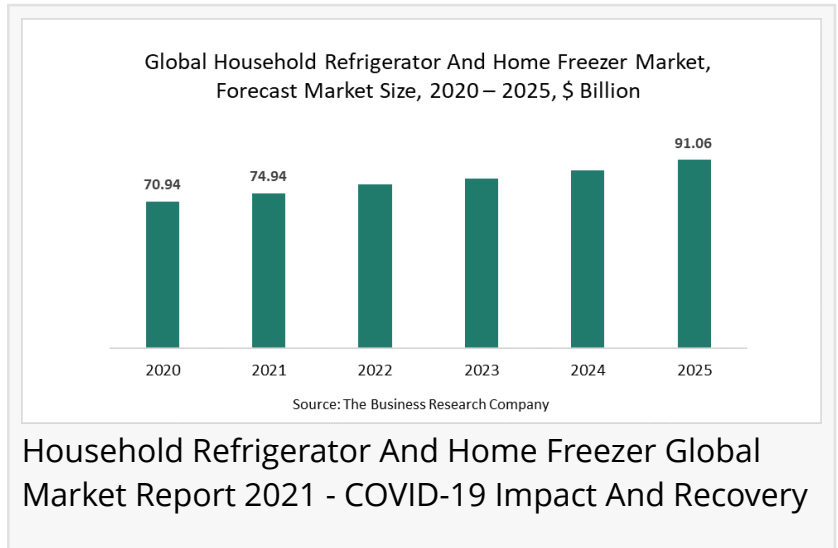

LONDON, GREATER LONDON, UK, October 11, 2021 /EINPresswire.com/ --

Household refrigerators and home freezer manufacturers are implementing technologies such as IoT and embedded sensors in their products to improve overall functionality. Manufacturers are

introducing advanced human-machine interface designs in refrigerators and also manufacturing refrigerators that can automatically recognize the type and weight of the food stored in the refrigerators, and adjust and monitor the temperature as per requirement.

The increasing consumption of processed food products such as frozen meat, vegetables, dairy products as well as change in the dietary habits of consumers is driving the household refrigerator and freezer market growth. Due to busy lifestyles, consumers are increasingly relying on processed food, prepared meals that require refrigerators for storage. According to Rentokil, the processed food industries are valued at \$2 trillion globally. The huge market for processed food products is expected to drive the household refrigerators and home freezers market.

The [global household refrigerator and home freezer market size](#) is expected to grow from \$70.94 billion in 2020 to \$74.94 billion in 2021 at a compound annual growth rate (CAGR) of 5.6%. The growth is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$91.06 billion in 2025 at a CAGR of 5%.
